

A thought for today

To err is human. To blame someone else is politics. HUBERT H HUMPHREY

Crushing Truth

Stampedes, like the one in Hathras, are frequent as official permissions for events don't ask basic questions

a statalities climb beyond 120 from the stampede at a religious event in UP's Hathras, authorities have promised the rir of response – compensation, investigation and bluster – that accompanies every such mass accident, which mostly claims lives of poor people. At least 2,000 people have died in stampedes over the last 20 years at religious sites and celebrations across India. The reality is there's barely any report of legal closure of any such tragedy. UP has ordered a judicial inquiry, there's a PIL for a CBI probe. A key organiser isn't named in the FIR.

In Hathras over 2.5L people had gathered when permission was for 806. Such massive overcowding and insufficient exits—motorbluse recklessly purked blocked the single entrance/exit—was worsened by rain that had turned the paddy fields into sludge. And as evident in events that led up to the crush, it was, as stampedes always are, a spiral of mass behaviour difficult to stop. Whether in the rush for a holy dip, or slippery steps to temples, or as in s fatalities climb beyond 120 from the stampede at a religious

holy dip, or slippery steps to temples, or as in Hathras, clambering to grab soil from where the godman had walked, it's momentary 'craze that drives stampedes. Patterns repeat themselves in every such accident. It is also evident why investigations rarely see accountability or action taken. Because

that drives stampedes. Patterns repeat themselves in every such accident. It is also evident why investigations rarely see accountability or action taken. Because after the mandatory noises, there's a deep-set belief stampedes can't be stopped.

Truth is, there are well-established measures recommended for large events to minimise the chances of a crush, of humans in frenzy and panie. Administrations, when granting approvals, must ensure adherence to the venue layout that's okayed, that exits and entrances aren't blocked, that there are a control room, live surveillance of crowd movement, PA systems, and crowd density monitoring. These are resources that should be available pre-event. Even learning from previous incidents is a gap in India's crowd management. That the Hathras godman had his own "narayani sona" to manageh is followers' throng shows a heightened awareness of crowd-behaviour at his events. Why are these details never a point of official note pre-event?

Nearly every high-fatality stampede in India has been during religious celebrations. And because it's religion, authorities north to south, east to west, tiploe around calling out those responsible. That is exactly the problem. Events—whether sporting musicalor religiousneed to be managed to ensure no injury and loss of life. Some are already talking of 'conspiracy', 'political nexus', and the baba's blue aviators. All that's not the south. The dead dwomen and children are already talking of 'conspiracy', 'political nexus', and the baba's blue aviators. All that's not the south.

already talking of 'conspiracy', 'political nexus', and the baba's blue aviators. All that's not the point. The dead women and children are.

Court Don't Contort

Hindu majority is under no threat from conversions. HCs should know this basic data point

an untruth told loud enough and often enough prevail over an an untruth told loud enough and often enough prevail over the truth? That this danger is very real today, is what is captured by the phrase post-truth world'. But in this very world, many institutions have been designated to fight on behalf of factuality. In the Indian setup, constitutional courts play a vital role in this fight. So, when their observations fly in the face of black and white data, or argue a subjective morality instead of objective precedents in case law, it is both disappointing and dangerous. Allahabad HCflying the bogey of Hindus being in danger of becoming a minority, falls squarely in this worrying category.

law, it is oth disappointing and dangerous. Alianabad Hcilying the bogey of Hindus being in danger of becoming a minority, falls squarely in this worrying category.

TFR reality | There is no arguing with India's fertility transition.

Overall TFR has already reached below replacement level, Muslims are recording a much fisser fertility decline than Hindus, and the definitive convergence between the two means that Hindus' huge majority is impenetrable. Between 1992-83 and 2019-21. Muslim TFR dropped 1.3 points to 2.4 and Hindu TFR dropped 1.3 points to 2.5 points to 2.4 and Hindu TFR dropped 1.3 points to 2.5 points deeper, only the wilfully blind will miss that the real cause of the first of the f

Modi Vs Rahul, House & Country

There is clearly some animosity between PM and LoP. This needs to be kept under check because India needs informal policy consensus. Closed-door meeting between the two will help

lany things have been s

Many things have been said about the first verbal skirmish in Parliament between NDA govt and opposition, or, more specifically between Leader of Opposition (Left) Rabul Gandhi and Prime Minister Narendra Modi. The most commonly beard comment is that opposition has finally found its view, and govt now cannot using its numerical majority.

It is good to have a strong opposition, just as it is good to have a competent govt, but what the first "debate" over motion of thanks to President's speech revealed was something more worrisome: the visceral dislike both Rabul and Modi have for one another, mirroring the divisiveness that is politically explicit between BIP and Congress & its 'seculiar' alless.

It is good to have a competent govt, but what the first "debate" over motion of thanks to President's speech revealed was something more worrisome: the visceral dislike both Rabul and Modi have for one another, mirroring the divisiveness that is politically explicit between BIP and Congress & its 'seculiar' alless.

what is happening in Manipur, and that neither of them (and their party) was a Hindu by his definition. PM, for his part, spoke of legal cases faced by Rahul, and how his party is riding on votes of its allies rather than its own strength. He referred to LoP's speech as infantile ("Balak Buddh").

None of this bodes well for the future of our mocracy or legislative processes, where many itentious issues, ranging from the forthcoming imitation exercise to creating a congenial climate

Even assuming Rahul's remarks on Hinduism BJP were only aimed at labelling BJP and S Partyar as hate-driven, those bits of his speech wer

Even assuming Rahular rememers on Hindhusm and BJP were only almed at labelling BJP and Saugh Particar ash and et driven, those bits of his speechwart too far Contrast these comments with his own assertion some time ago that his ally Maslim League, was a "secular" party Sangh many not represent all Hindus, but it deserves legitimate social and political space for carvassing its own version of nationhood, which Rahulmay disagree with.

Worso, he made baseless allogations about too Aguipath marryers, and compensation to Aguipath marryers, when the truth was otherwise. It is one thing to demand accountability from gort in office, quite another to use lies or half-truths for short-term point scoring.

Rahulmad his advisers obviously believe that attack is the best form of defence. They have tried to throw all kinds of muck. In the age of social media, what happens in Parliament can quickly be made viral in shorter clips, never mind the expungement of such remarks by the Speaker Govi is thus forced to come up with delayed fact-checking rebuttals and denials. As the saying goes, a lie can travel halifway around the world while truth is still ving its shockness.

Since opposition plants to give govt a torrid structure of the country around the world while truth is still ving its shockness.

A parliament where govt and opposition are at dageors drawn all the time cannot work to solve India's real problems, including agreeing on some informal limits to what kind of freebles can be offered to voiers agree to disagree agreeably and put limits on how far they will take their visceral hardes when larger interests of the country areat stake.

A closed door meeting between Mod and Rahud could help set some limits in public discourse. A joint meeting between senior B.IP and opposition members to loog their political animosities within bounds is also called for. The vicious sampler we as an in Parliament this week should worry everybody who cares for India that is Bharat.

80K Question: Why's Market OK With Macro Problems?

Investors are cheering good news from the top 10% of the economy. Post-reforms. stock market booms have never waited for broad-based economic growth

where the way to be the second and the people were worrying about election results and its impact on markets. But markets have continued to make all time higher than the continued to make all time higher than the continued to make the continued that the continu

The macro backdrop | Recent GDP growth figure came in a 62% for FY24, surprising estimates on the upside. While inflation's a tad sticky, it's not alarming. Global commodity prices, especially oil, are holding down at moderate levels. Current account came in at a rare surplus level of 65% of GDP in the last quarrent FY24. Strong growth mux revenues has kept pest-Covicthscal consolidation (at a Union Budget) level out racel. Economy on one-and-a-half stilts | Looking b

Economy on one-and-a half stills | Looking beneath the bood, economy is powering along on one and a half exhiders—streng public investment and a sustained pickup in premium consumption. The latter half) exhibiter is primarily driven by the large wealth exhects of a booming stock market and strong growth in high-end services jobs. A banking system with the label of the properties of the p

Private & public capex | Investments have been the strong pillar of growth in recent times, touching 83.7% of GDP in PY24from 81.6% in PY18. More than one-third of investments is real existe. Despite robust growth in luxury housing demand, nearly the entire increase has been on account of public investment. Between Centure

pirVate caper, though, unspire once accounts between the common defeating the common defeating. Meanwhile, public caper has started facility and consoning headwinds. Recently, Karnataka and Maharashtra goots rolled out extensive welfare budgets, which can only be financed out of a reduction in capex outlays. While the overall fise is comfortable, there is still work left toward off the effects of Covid. Consolidated (Centre and states) fiscal deficit is over \$6.5°. Thanks to lower core inflation, nominal, GDP growth has been stuck in single digits for many quarters now -9.6% in

FY24 - preventing debtfrom being inflated away Between political-economy imperatives and continuous capex pump prime, something has to give.

Jobs, consumption, investment | Why is private capex still weak? Simple, it's all about demand. There just son't enough aggregate demand to absorb existing factory capacities. Capacity utilisation rates have been stuck at the 75-98 varage for a long time. Above all, in a range of goods, China has enough capacity to Highbold demand. There is a competitive Chinese supply at every price point available, eredding pricing power of Indian manufactures. While there are traff protections now in some sectors. Chinese capacities enable price

competitiveness across moderate tariff walls. Thus, neither domestic nor global demand has given India I to the confidence to invest big.

Sans consumption revival, there will be no private capex. Higher consumption requires more income in the hands of citizens, More income can only come from more jobs, Jobs, especially in the organised sector, have been tough to generate on a large-scale.

been tough to generate on a large-scale.

But markets and macros are decoupled | Are markets decoupled from the macro? Yes. And it's a global phenomenon. But decoupling in India has been quite sharp in the last decade and a half.

From a macro performance perspective, India's a lavags been a on sistemity in global Tupo I lists. But always been a consistemity in global Tupo I lists. But always been a 50-50 country Economic growth, since 1994, has been consistenity in global Tupo I lists. But and 5008, I lists a list of the since I make I have I look, most involved to the standard macroscopic and the I list of the I list of I lists. But and I list of I lists I list of I lists I list of I lists I list of I lists. But and I list of I lists I lists I lists I lists I list of I lists I lists I list of I lists I lists

Hathras stampede

Draw lessons to improve crowd management

was a disaster waiting to happen, with around 2.5 likh people crammed into a venue in which only 80,000 were permitted by the authorities. The death foll in the stampede that broke out during a 'satsang in Hathras (Uttar Pradesh) has crossed 120; the victims were part of the crowd which had gathered to hear a preache: According to the FIR, the organisers secured permission for the ungregation on the basis of a false undertaking about the actual number of devotees who were expected to attend it; they are also accused of refusing to cooperate with the police in traffic control and concealing evidence after the incident.

It is invariant and unfortunate that in a country where people throng one religious place or the other on a daily basis, crowd management often leaves a lot to be desired. A decade ago, the National Disaster Management Authority (NDMA) had brought out a guide on managing crowds at events and venues of mass gather-ing. This document was aimed at spurring state govern-ments, local authorities and organisers to adopt an integrated and structured approach to crowd and disaster management. The NDMA had stated that man-made tragedies such as stampedes could be prevented with proactive planning and flawless execution by dedicatof groups with well-trained personnel. However, all this was conspicuous by its absence at the Hathras event. Giving misleading estimates about the size of the

audience or congregation is a common ploy to get the administration's nod. At times, palms are greased to get the job done. However, the organisers cannot be solely blamed when things go borribly wrong. The authorities should exercise due diligence in granting permission; spot inspections are a must to ascertain whether adequate safety arrangements have been made for even the worst-case scenario. The way for-ward is to take exemplary action against those whose rank negligence or greed puts lives on the line

On road to equity

Inject capital in free bus rides for women

HE free bus travel scheme for women in non-AC, infra-state buses across Punjab, initiated by the state government in 2021, has signifi-cantly empowered women by enhancing their mobility and providing them substantial financial relief. Serving as a lifeline, it enables girls and women to commute to better educational institutes and workplaces and even visit their family members without

workplaces and even visit their family members without the burrien of travel exist or dependence on others. The success of the scheme is evident from official data: in April 2021, around 61 lakh women be neftled from this scheme every day in the state. By November 2022, this figure had nearly doubled. However, the state run Popal Road Thasport Corporation (PRTC) is facing a resource crunch, with the government owing the PRTC over Rs 250 crore in ement for the free travel provided to women. The terminatement to the nee travel product to women. The delay in clearing these dues has left the PRTC struggling to release salaries and pensions. The government must explore other avenues to address concerns over the sustainability of this service. A cross-subsidy mechanism is a viable option to mitigate financial losses. By slightly increasing fares for other passengers or introducing additional charges on premium services, the government can offset the costs of the scheme. Public-private partnerships as part of corporate social responsibility and targeted sub-sidies could also provide some financial support.

The free bus service has undeniably improved the lives of women in Punjah, enabling greater equity and participa-tion in education, work and family activities. Ensuring the scheme's long-term sustainability is crucial as at its bound to foster socioeconomic growth in the state. Promoting women's empowerment is a crucial developmental objective as they tend to invest more in their children's educa-tion, health and nutrition, which, in turn, boosts economic growth. Social capital is recognised as one of the pathways through which empowerment can be achieved.

ON THIS DAY...100 YEARS AGO

The Tribune.

An eye-opener

WHILE the country is waiting with bated breath for the detailed impressions of the Maintain regarding the last meeting of the All India Congress Committee, at which he was himself the central figure, it is only natural that the somewhat laconic state-ment which a representative of the Associated Press succeed-ed in eliciting from him at his first interview should form a ed in eliciting from him at his first interview should form a subject of videopread comment. "Though on all the four rea-lutions that I had the honour of moving," said the Mahatma, "I had a mijority, I must own that according to my conception I was deleased. The proceedings have been an eye-opener to me, and I am now occupied in a diligent search from within. As yet I am without an answer "The literal meaning of these words is perfectly clear. The Mahatma had not the sort of majority to which has held been accustomed in the root while a search to perfectly elser. The Mohatma had not the sort of majority to which he had been accustomed in the past while as regards the crucial question of the exclusion of Sourajists and other non-believers in his programme, he had no majority at all. This was not only contrary to his espectation but showed how largely he had overrated the measure of support which his programme and policy had in the country. That to him the meeting of the All India Congress Committee was only a test, we know from his even articles in *Totago India*. He wanted in know he said again and again, where he stood and where the Congress and the country stood. The meeting of the Committee, the speeches made util, in some cases by professed No-Changers, and above all the results of the divisions constituted as convincing an answer to this question as he could possibly have expected.

Roll out a roadmap to rebuild agriculture

The sector needs out-of-the-box thinking, however much may it upset the governing elite

DEVINDER SHARMA

OR any discerning reader, this is a shockreader, this is a shocking revelation — in
two decades, the price
of bread in Switzerland has doubled, but the farmgate price of wheat has come
down by half. This is an arrangement that has kept everyone
hanny everyone hanny everyone happy, except the farmers

happy, except the farmers.

A former chairperson of the Punjab Farmers' and Parm Workers' Commission, Ajay Vir Jakhar, recently tweeted; "Twenty years ago, the price of bread in Switzerland was 2.5 Swiss finance (CHP) and the price of wheel was 110 CHF per kg, Today, the price of bread in SCHF and the price of flowed its SCHF and the price of flower in the price of flower i of bread is 4 CHF and the price of wheat is 50 CHF per kg." Some-time back, I had shared an examtime back, I had shared an example from Canada, where wheat prices had tumbled over the past 150 years but bread prices had comed in the past four decades. This disturbing trend of declin-ing farm output prices is not exclusive to Switzerland and Canada — it is more or less a global phenomenon. But over a century now, farm prices have been declining steenly rushing. been declining steeply, pushing farmers to either commit suicide, farmers to either commit suicide, abandon agriculture or struggle to survive against all-pervasive distress. This is food inequality. People who produce food end up living perpetually in pover-

ty. Often, it has been seen that the farm prices are low and do the farm prices are low and do not even cover the cost of pro-duction. The tragedy is that those who bring food to our tables can't even afford to feed themselves. With successive governments pushing for increased productivity, the farmer's welfare was simply overfooted. Very eleverty, while farmers feit easily elated when

called annadata, the other stakeholders in the agricultural supply chains rolled in profits. In the process, farmers have been rendered bankrupt.

While farmers suffer and rural wages stagnate, the broken food wages stagnate, the broken food system has lept censurers happy. Keeping food prices deliberately low and pushing them still lower with every passing year, and at the same time extracting excessive profile — saller's profit, as it is now called — has led agribusiness companies to laugh all the way to the bank. Althoughe corporates blame rising wages and supply chain bottlenecks for the rising prices, studies have and supply chain bottlenecks for the rising prices, studies have shown that in the US, for instance, in the second and third quarters of 2023, corporate profi-its fuelled 53 per cent of the infla-tion. Further, corporate profits numed after the Critici manderjumped after the Covid pandemic, reaching a record high by the last quarter of 2023. In the four

last quarter of 2023. In the four decades prior to the panderric, the contribution of corporate profits to inflation was only around it per cent. For over a century and a half, the economic design had denied rightful prices to farmers. Obvi-ously, with policymaleres turning a blind eye to the deepening cri-

Policymakers are again skirting the real cause of farm distress - falling farm incomes.

sis on the form front, rural angeas on the farm front, turn ange only gets highlighted in the elec-tion season. 'India's govern-ment claims to subsidise farm ers, but actually hurts them (The Economist, July 12, 2018) provides an interesting insight While the OECD (Organisation While the OECH Organisation for Economic Cooperation and Development) countries, the richest trading bloc, provide an equivalent of 18 per cent of the farm income to producers. India actually ends up taxing them. Accordingly, 6 per cent of the farm income is ampropriated on

farm income is appropriated on an average in India. In another

prices between 2000 and 2016,

prices between 2000 and 2016, the real benefit accrued to con-aumers, who gained by 25 per-cent in subskilled prices.

As the Finance Minister gets ready to present the full Budget of 2024-25, it is time to visualise what kind of economic posicies are needed not only to assunge farmers' growing angee but also to lay out a nodmap for rebuilding agriculture. Remember what economist Jean Dreze had onomist Jean Dreze had marked: "Political discourse in remarked. "Political discourse in India no mally takes place with-in certain boundaries set by the privileged and powerful. If you overstep these boundaries, espect some trouble." Agricul-ture needs out-of-the-box think-ing, however much may it upset the saverning elite.

ing, however much may it upset the governing elite.

All these years, the predominant route to raising farm incomes has been through more budgetary support for technological interventions. Even with the move towards digitalisation, artificial intelligence, robotics and precision farming, thereby bringing agriculture increasing vinto the corporatisation lap, it has to be acknowledged that

while the industry around agri-culture has and will benefit immensely from such budgetary support, farmers continue to be pushed deeper into distress. Productivity gains haven't translated into living income for formers. If from income contin-

farmers. If farm incomes contin-ue to be at the bottom of the pyramid even 60 years after the Green Revolution, the promise of technological transformation towards Agriculture Revolution towards Agriculture Revolution
4.0 cannot be seen as a paracea
for all the ills afflicting agriculture. As usual, policymakers are
once again skirting the real
cause of farm distress—falling
farm incomes—and trying to
cover it up with the flawed thinktion that colorable leads in the paraing that technological interven-

ing that technological interven-tions will boost incomes. Amid 'global boiling', resilient agriculture will come from regen-erative farming practices. More than artificial intelligence, what is needed it to first tulisie avail-able natural intelligence. It is important to first stored in buildimportant to first invest in build ing the capacity and potential of human population engaged in agriculture. The dominant ecoagriculture. The dominant eco-nomic thinking will not be com-fortable with this; but the time has come to look beyond the pre-designed parameters. Given that agriculture is the biggest employer in the country, employing 45.5 per cent of the

wurkforce, making agriculture a profitable enterprise is the need of the times. The conventional of the times. The conventional thinking of helping the industry which, in turn, will help raise farm incomes — conforming to the trickle-down principle — is unlikely to work.

To remove fixed inequality, there is a growing need for fresh, there is a growing need for fresh.

there is a growing need for fresh thinking. First, provide a legal mechanism for guaranteeing farm prices as per the MS Swaminathan formula; second-Swaminathan formula, second-by, the Finance Minister should ensure that 50 per cent of the Budget is allocated for roughly half of the population. To begin with, start enhancing the farm budget every year by 10 per cent of the total. At present, it is less than 3 per cent.

There is too little public recognition of how much we all depend upon farmers. - John F. Kennedy

The prophecy at Amarnath shrine

LT GEN PRADEEP BALI (RETD)

HE annual pilgrimage to the Amarnath shrine in south Kashmir commenced on June 29, with the devoit undertaking the arthous journey to pay obelsance to Jord Shwa in the holy cave located at an altitude of about 3,800 metres. A quarter of a century ago, I made the

journey to the abode of Baba Barfani. In 1999, I was deployed in a Rashtriya Rifles (RR) unit in In 1999, I was deployed in a Rashtiya Rifles (RR) unit in Amenhangdistic, carrying out counter-insurgery operations. Taking a short break I decided to teek to Amarush. An officer of my unit, Maj Ranbir Kotoch, who was from the Army Air Defence Corps, asked me if hecould come along Rasbirshway had a ready smile and was full of bears and guts—the kind of officer any commander would have to have in his team. On August 11, we set course for Pshaligian and onwards to Chandawari, from where the conward journey of 32 kin was on foot. A steep climb of about an hour took us to Pissu Top, after two more hours of footis vanishing we reached another landrands or more hours of brisk walking, we reached another landmark on this trail, Shesh Nag. With breaks in between, we traversed

this trail, Shesh Nag. With breaks in between, we traversed Mohangunas Top and Fo shpathri, finally reaching Panjtami by nightfall. Here was a large tented colory for pilgrims, and Rambir shared a tent with me for the night.

On August 12, we were up at the crack of dawn and negotiated the final 6 km at a fast clip to be the first ones at the cave, much before the pilgrim bordes started moving up. The head priest of the shrine conducted a prayer for us, while we stood in reverence in front of the ice Shiviling. Turning to me, he banded core may be updated to the process of the shared core to the conduction of the con handed over proson, a small vermillion box, bangles and a piece of red ribbon, telling me that these were for my wife as a

piece of red ribbon, telling me that these were for my wife as a blessing for marital longweity. He then turned to young Ran-bir and said: You must not be married yet.

I was quick to correct him and informed him Ranbir was murried. He expreased regret that since it was early in the morning, some of the pagin items, including different kinds of preasad, had not mived and be did not have any more of the marital symbols of blessing. However, he handed Ranbir some preasad and a miniature photo of the Shivling. About three days lates we bunched a cordon-and-search oper-ture of the properties of the properties as a second of the properties as a second of the properties.

ation in a remote village, based on information about the presence aton in a remote village, based on information about the presence of terrorists. Rathir was in the outre cordin with his troops, and while combing a maize field, ran into two heavily armed foreign millitants. In the ensuing guilfight, both millitants were kined, but at a very heavy price. Lesting from the floot, Rathir inceived a bunst of automatic fire and made the supreme sacrifice. Next morning, his embalmed body was sent on a commercial flight to Delhi, escorted by one of our officers. I remembered the incident at the holy cave when I paid my last respects to this braveheart—and it continues to haunt me. The 'denial' of marital blessings on that fateful morning was indeed prombettic.

was indeed prophetic.

Stop revering godmen

Stop revering godmen
Refer to '116 killed in stampede at UP's
Hathras as disciples vie for their guru's
glimpse'; as mary as 25 laich people had
resportedly cranmed into the venue meant to
accommodate just 80,000. It is a pity that so
many people still rive as self-proclaimed gurus.
These godmen hold massive sway over the
masses. Horste of gullitile people credulously
believe everything these godmen say. It goes
without saying that Bhole Baka bears responshibit for the stampede. But those who had
crowded into the venue are also to biame for
the tragedy. Their irresponsible behaviour care the tragedy. Their irresponsible behaviour can not be excused. The ongoing probe will help fix accountability for the harrowing episode.

r the harrowing episode.
O PRASADA RAO, HYDERABAD

An avoidable tragedy
The stampede in UP's Hathras that has daimed more than 100 lives was an avoidable tragedy, which makes it all the more heartrend ing. The deadly mix of utternegligence on the ing. The deadly mix of utternegligence on the part of the organises, indifference of the authorities concerned and widespread ignorance among the masses is to blame for it. Why were hordes of people allowed to throug the venue without adequabe arrangements in place? As is the norm, the government is giring to set up a committee to uscertain what went wrong. Authorities across the country must draw lessons from this triggedy and take effective stores for more than a committee of the country must have lessons from this triggedy and take effective stores for meaning a mental of the country.

tive steps to prevent a repeat of it.

Manufacturing on the rebound

India's manufacturing sector is on the rebound, with the HSBC India Manufactur-ing Purchasing Managers' Index (PMI) reaching 58.3 in June. The remarkable growth, driven by domestic demand and govemment infrastructure spending, showcases India's resilience and potential. The sector's India's resilience and potential. The sector's strong performance is a testament to the country's status as the fastest growing major concern in the world. The record pace of job creation, with hiring surging for the fourth consecutive month, is a significant achieve-ment. While inflationary pressures persist. manufacturers have managed to maintain profit margins by passing on higher costs to consumers. As the government prepares to present the full Budget, the manufacturing sector's growth is likely to be a key highlight.

SAHIBPREET SINGH, MOHAL!

Biden's age not a hurdle

Sustainable development

The recent report showed mixed results

The recent report showed mixed results

The state and six years remaining, the Sustainable Development Goals (SDGs), part of the United Nations' 2030 Agenda for Sustainable Development, require intensified effort on India's part to achieve its serve as a universal call to action to eradicate poverty, achieve gender justice, safeguard the planet, and ensure peace and prosperity for all. In this regard, the recently released progress report on SDGs in India offers data-driven evidence, which underscores mixed progress by the country towards achieving the SDGs and their corresponding targets. Under SDG Into poverty), India has done well in recent years. The report shows a 3-89 percentage point reduction in multidimensional poverty (MDP), dropping to 14.96 per cent between 2015-16 and 2019-21. A recent report by the NITI Aayog indicates a further decline to 11.28 per cent in 2022-23. Sustained effort will be needed to further reduce the level of poverty and increase Sustained effort will be needed to further reduce the level of poverty and increase real disposable income.

real disposable income.

Continued government intervention will be needed in other areas to improve the quality of life. The report, for instance, emphasises that while maternal and child health has improved with a decline in malnutrition, stunted growth, and maternal and infant mortality rates, there has been a notable rise in anaemia among women aged 15-49 years and children below five. Under SDG4 (quality education), the gross enrolment ratio in higher-secondary education, the rate of vocational- and technical-training participation, enrolling differently-abled students, the teacher-student ratio, and school infrastructure have shown significant improvement since 2015-16. However, the completion rate for grades 6th and 8th asdropped below the pre-pandemic levels, reflecting how children were affected due to pandemic-related disruption. Further, the increased genale labour force participation rate has been accompanied by a rise in wage disparity, downy cases, and crime rates, including sexual crimes against women. These factors necessitate increased government expenditure on health, education, and social protection. However, the report indicates the share of expenditure on essential services in government spending has declined from pre-pandemic levels.

Furthermore, in pursuit of sustainable and carbon-neutral growth. India committed itself to achieving its net zero target by 2070 at the 2021 Conference of Parties-26 (COP-26) in Glasgow. This report highlights progress with increased shares of renewable energy and improved industry environmental compliance, signalling positive steps in this direction. However, an increase in per capita fossil-fuel consumption and a stagnant forest cover counteract these advancements. Moreover, the proportion of government expenditure allocated to environmental protection has seen minimal improvement, increasing by only 0.3 per cent of gross domestic product from 2015-16 to 2022-23, suggesting that the government needs to do mor in this regard. Continued government intervention will be needed in other areas to improve

needs to do more in this regard.

SDG 16 (peace, justice, and strong institution) strives to achieve peace, effective SDC 16 (peace, justice, and strong institution) strives to achieve peace, effective governance, and a transparent judicial system. In contrast, the report shows increasing rates of crimes against children and women annually. Furthermore, India lags significantly behind global standards, with only 193 courts and 153 judges per 100,000 people. The data also shows the percentage of responded RTI (Right to Information) queries has declined. Overall, while India is growing at a healthy pace, the benefits of growth seem to be not reaching some sections of the population. If economic growth is concentrated, it would undermine the economy's long-term prospects. The government would do well to focus on lagging areas to attain the stated goals in the coming years.

Lagging indicator

Gender diversity in India Inc still sub-optimal

orporate India's record on gender parity in the workplace has never been orporate India's record on gender parity in the workplace has never been optimal. Narrowed down to the boardroom and senior management, two recent studies highlight India's distance to horizon on this key marker of cultural progress. One by the National Council of Applied Economic Research (NCAER) found that India Inc, with women's share of top and middle management at 20 per cent, lagged global average of 33 per cent (as 2019), another analysis by *Business Standards* showed that India's women directors were paid nearly 40 per cent less on average than men in the same role. The NCAER study also showed that almost 60 per cent of the surveyed firms did not have women in senior or middle-management roles. Five of the top 10 National Stock Exchange (NSE)-listed firms by market cantalisation had no women in Stock Exchange (NSE)-listed firms by market capitalisation had no women in their top management teams as of March 2023. While more than half of the NSElisted companies in the sample did not have a woman as part of their top man-

their top management teams as of March 2023. While more than half of the NSElisted companies in the sample did not have a woman as part of their top management, about 10 per cent had just one.

The situation is slightly better in corporate boardrooms, where women's
share has risen from a little under 5 per cent in FY14 to 16 per cent in FY23,
according to the NCAER study. This relatively gender-balanced picture — still
lower than the global average of 20 per cent — is more the result of a mandate in
the Companies Act, 2013, than a progressive social consciousness in corporate
in the Companies Act, 2013, than a progressive social consciousness in corporate
one woman director on its board. Rather than accepting the spirit of the mandate,
many managements, especially at family-managed entities, sought to cynically
fuilfil the letter of the law by appointing relatives — mothers, wives, daughters—
who were not necessarily qualified to dispense managerial wisdom. This sapect
was highlighted by a committee on corporate governance set up by the Securities
and Exchange Board of India (Sebi), which proposed that the mandate exclude
promoters' relatives. Accordingly, in 2018, Sebi made it compulsory for boards of
India's top 500 listed companies to have at least one independent woman director
by April 1, 2019, and top 1,000 listed companies by April 1, 2020, ensuring that the
exercise was not reduced to box-ticking.

The dearth of women in middle and senior management, however, is likely
to escalate into a problem in creating a pipeline of qualified women to fill directorial
positions in the future. More so when Business Standard's analysis shows that the
average remuneration for women has increased at only 1.8 per cent compound
annual growth rate in the past decade, compared with 9.4 per cent for men, leading
to a wider gap today than 10 years ago. The study found the situation to be worse
at companies other than the top ones. The average salary of women executive
directors across NSE-listed companies has declined 1.

directors across NSE-listed companies has declined 1.2 per cent since 2012-13, while it has risen 7.4 per cent for men executive directors. Given these weak incentives for women to rise within corporate hierarchies, gender diversity in India Inc is likely to remain a distant goal.

Budget must signal change

It needs to move beyond headline GDP to prioritise job creation and alleviating rural distress

IF TRUTH BE TOLD

with the election done and dusted, it's time to get back to the business of running the country. The Budget for FY24-25 presents the government with an opportunity to show how it has sorbed the messages sent by the electorate. It cannot be business as usual; it must be a Budget for change be business as usual; it must be a Budger for change. People have signalled that they want a greater focus on employment and alleviating rural distress. While headline gross domestic product (GDP) growth is undoubtedly important, it is not enough — the nature and quality of that growth matter as well. It's also a message that free food and other handouts were important, especially in coping with the pandemic, but they also are not enough. People want a hand-up to better jobs and the dignity of employment, not just food and gas cylinders. Welfarism has its limits.

JUST TOOG AND GAS CYPITICETS. WELLEASON
has its limits.

As the finance minister promised
even before the elections in a speech
to industry body FICCI in February
this year, the government would focus
after the elections on what economists

the syear, the government would occus after the elections on what conomists call factor-market reforms — land labour, capital and digital public infrastructure. She was right in January and the symbol of the symb

where India is a pioneer — can only help even more. While India desires to keep up its capital expendi-ture, it must also pursue fiscal consolidation more aggressively. The goods and services tax (GST) has finally stabilised and is generating more revenue finally stabilised and is generating more revenue.

Disinvestment provides another potential source for the future. The existing system for disinvestment—where a target is amounced, does not work. Even the government has recognised this. Based on my earlier study at the National Institute of Public Finance and Policy on India's public sector units, except for the Maharatnas, I would suggest a massive privatisation but the way it is done matters hugely.

Harding one rette asseste to a few.

but the way it is done matters hugely. Handing over state assets to a few chosen corporations, add not Russian oligarch-style privatisation, is not the right way. Transparent processes, competitive bidding, and ensuring that some of the funds are set aside for worker compensation are vital for strategic disinvestment to succeed. In democratic countries with reasonably developed capital markets, open market sales (share sales) could be designed to widen ownership and cre-

BE IOUD

market sales (stare sales) could be designed to widne ownership and create a greater public stake for the discussion of the designed to widne ownership and create a greater public stake for the discussion of the discuss

model does not create enough employment, it does not lead to higher incomes among the masses, and therefore consumption demand remains tepld. Lending to the corporate sector has remained low and the recovery in investment has not materialised. The banking sector is tiching to lend but as corporate borrowing has not picked up, it has increased retail lending hugely and very rapidly. This has prompted the Reserve Bank of India to issue a warning, cautioning banks against "exuberance" and targeting top-ups to mortgage loans.
While better infrastructure has improved India's

OPINION 9

While better infrastructure has improved India's While better infrastructure has improved India's logistics, the costs of using it remain very high. Instead of expanding the PLI scheme as big business lobbies are demanding, lowering the costs of doing business will bring wider benefits. Lowering raif freight costs by covering more of the cross-subsidy to passengers in the Budget, lowering electricity prices to producers by absorbing more of the discoms losses, and bringing petrol and diesel into the GST — even at the highest rate of 28 per cent—would be abetter use of foverment funds.

losses, and bringing petrol and diesel into the GST—even at the highest rate of 28 per cent—would be a better use of government funds.
People look at the success of China and Korea to draw lessons and argue that India needs aggressive industrial policy to drive growth. Ves, that is correct, but they also did many fundamental things that laid to foundation for their miraculous development. Universal education and primary health care were a key element. Both freed up land with major agricultural reforms and, in Korea's case, even land reform. Both urbanised very rapidly but used the urban designated land optimally. India can also pursue an industrial policy, but its objective must be to boost exports and employment. It must also focus more on education and health.
Finally, a big low-hanging fruit is tourism where India is underperforming significantly. With its heritage, religious, beach, mountaineering and desert tourism, India has it all but needs a master plan for the next five years, which should focus on women's active, cleanifies, and turning "Incredible India" into the proposed of the control o

into a "Credible, Safe India" to attract tourists. This will help bosts employment to. Some of India's boldest reforms have come during a coalition government. It is time for such reforms to set India on a path to a more inclusive sustainable development path. Merely feeling satisfied with headline GDP numbers without more employment will not lead us to Viksit Bharat. The time to change course has come, and the upcoming Budget provides the opportunity to clearly signal this change.

Breaking the minerals monopoly

In the 21st century, critical minerals and rare earths have taken centre stage, becoming crucial for electronics, renewable energy, electric vehicles, defence, aerospace, and medical devices. For instance, the International Renewable Energy Agency's pathway to restrict global temperature rise to 1.5°C posits that renewables will constitute 91 per cent of the energy mix by 2050, requiring massive quantities of minerals like silicon, silver, lithium, and rare earths such as neodymium and dysprosium. The surging demand and depening reliance have classified these and other minerals like graphite, manganese, cobalt and nickel as "critical", highlighting their pivotal role in shaping future technologies and industries.

The global surge in demand has

future technologies and industries. The global surge in demand has elevated critical minerals to the status of strategic assets and geopolitical tools. These minerals are concentra-ed in a few nations, with China being the dominant one possessing substan-tal reserves of dysprosium (50 per cent), and graphite (56 per cent), China's mineral dominance is fortified by securing advantageous agreements accurated advantageous agreements accurated advantageous agreements accurated.

dominance is fortified by securing AIAY KUMAR advantageous agreements across Africa, Latin America, Central Asia, and Australia, often through initiatives like the Belt and Road Initiative (BRU). For instance, China's \$1.3 billion BRI investment in mineral exploration and processing in Ghana, Guinea, Niger, Sierra Loene, and Mali ensured privileged access to bauxite and lithium. In Ghana, the involvement of SinoHydro, a Chinese firm in aluminium processing from Ghanalan bauxite, grants China concessional terms over 20 wears while the

minium processing from Ghanaian bauxite, grants China concessional terms over 20 years, while the Ghanaian entity repays the Chinese loan. Additionally, China's monopoly is reinforced by being the mineral processing capital of the world. China controls substantial global shares—graphite (80 per cent), daysprosium (100 per cent), manganese (93 per cent), and readymium (88 per cent). This industrial prowess of China, driven by economies of scale, has reduced their processing costs and erected significant barriers to entry for other nations, solidifying China's control over mineral supply-chains.

The monopolistic weaponisation of critical mineral supply is raising concern. In 2010, China restricted rare earth exports to Japan amidst a territorial dispute.

Recently, when the US restricted semiconductor technology sales to China in October 2022. China imposed export controls on germanium and gallium from August 2023, commodifies crucial for semiconductor manufacturing where China holds 60 per cent and 80 per ent of global production, respectively. Amid ongoing tensions between China and the US over the South China Sae, China also restricted exports of synthetic graphite grades crucial for defence and aerospace, where it maintains almost complete market dominance.

Other geopolitical initiatives include the possibility of creating an Opec-like cartel by resource-rich nations, a "Buyers Club" to awold a bidding war among G7 countries or strategic stockpiling by others. The US and the EU are promiting localisation and friend-shoring of critical minerals even though it means higher costs. During

moting localisation and friends we shoring of critical minerals eventuough it means higher costs. During Marendra Modi St Usvistin 2023 the critical minerals (St Usvistin 2023 the critical minerals partnership was high on the agenda. The Mineral Security Partnership, as US initiative with 13 countries and the EU beginn in mid-2022, and India is ambitions for net-zero emissions by 2070, semiconductor foundries, and expanding defence, nuclear, and space industries underscore the critical importance of minerals like lithium, mickel, copper, and cobalt. With India heavily reliant on imports for these minerals — 100 per cent for cobalt, nickel and lithium, and 39 per cent for copperand its concentrates — securing supply chains is crucial amid potential geopolitical pressures and vulnerabilities in strategic sectors.

India has abundant heavy minerals, found in the sands of Kerala, Tamill Nadu, Andhra Pradesh, and Colsha, and significant deposits of polymetallic ferromanganese nodules and crusts in the Andaman Sea and Laishadweep-Sea, along with deep-seated deposits inland. Despite possessing over 210 million tonnes of graphite and 65 million tonnes of limenite and rutile, production remains minimal, with most exported as war material. Many critical minerals have remained undiscovered due to the focus on bulk minerals, neglecting deep-seated critical minerals. Exploration was restricted to government entities, hindering investment and adoption of advanced prospecting technologies.

Recent government initiatives are promising. Recognising 30 minerals ascritical, the government has taken over their prospecting to streamline efforts of the states. In 2019, 100 per cent foreign direct investment was allowed. The Geological Survey of India has launched over 250 projects to septice deep-seated critical minerals. Amendments in 2023 to the Mines and Minerals (Development and Regulation) Act, 957, and the Offshore Areas Minerals (Development and Regulation) Act, 2002, have permitted the entry of the private sector through auctions. Certain minerals previously classified as atomic, have been reclassified, facilitating private-sector mining. Three rounds of auctions for blocks of lithium and rare earths started in November 2023 have been completed. Offshore blocks are also set 2023 have been completed. Offshore blocks are also set for auction, opening new opportunities, and startup challenges aiming to develop advanced processing technologies have been launched. Stockplling key minerals for renewable energy, automotive, space, defence, and semiconductor sectors is also under examination. Arthe same time, India is starting to collaborate with other countries. Khanji Bidesh India is assisting Argentina in lithium exploration across five blocks and discussing lithium and cobalt blocks in Australia. India.

discussing lithium and cobalt blocks in Australia. India, as a trusted friend of Africa, should be investing in beneficiation and processing facilities, promoting local economies and sustainable relationships. To explicit international initiatives, the government should involve both the private sector and public sector undertaking. India must enhance its mineral processing capabilities to meet its work of the productive of the productive internation of the productive international control of the productive international productivity norms, load and draw inspiration from Indonesia's success in nector loss of debuilds in certificative subsects in nector loss of debuilds in certification control in the control of the productivity in the pr

n nickel to lead globally in critical minerals, where it has access to domestic and international raw materials nata access to domestic a than International raw materials. Like oil-refining India has the potential to become a global leader in lithium refining and to adfress obtiences in ricitical minerals. To a chieve this, the production-tinked incentive scheme for the other bishould be tallored to meet global aspirations, generating significant employment opportunities in the process. Will policy initiatives have been implement process. Will policy initiatives thore there have been implement of the process. When the process we want to be the process of the proces ed, there is now a pressing need for investments and technological advancements.

Yin, yang and assumptions

BOOK REVIEW

GUNJAN SINGH

India and China are two of the world's largest civilisations, countries and economies. Both have adopted strikingly different routes to reach the position they are in today. India adopted the path of a democratic governance while China moved towards the one-party authoritarian state. The author asserts that this this characteristic state of the control of the cont authoritarian state. The author asserts that "this yin-yang of national narratives has unfolded uniquely for each nation ow the centuries, shaping their individual, path-dependent trajectories. 'The book also explores major events, policy decisions and follateral realities that have shaped the path of both nations.

The author says he hopes to provide an overview of how India and China are affecting the global order in their own way. In effect, though, he has presented a comparative study of the two countries. The book certainly provides detailed information about the changes and developments that have been underway in each country. But it doesn't engage with any one specific development in detail. In the process, the quality of the analysis is finadequate. The main premise of the book is that both nations have had different growth trajectories and thus are today at very different positions on the development scale. The book also offers a book at how both countries can exploit their current enables and explain the control of the countries and exploit their current enables. The author says he hopes to provide an

realities. The author sums up the presen realities. The author sums up the preser position of the two countries in the following way: "Multicultural diversity versus monocultural unity, centrifugal versus centripetal forces, non-violence versus war, democracy versus communism, continuity versus

disruption, long-term stability and socia usruption, long-erimstaniny anaextai consensus versus short-term growth risks and imposed views highlight the swirl of yin and yang through the contrasting histories of the two nations". These are the yins and yangs that the author discusses in various chapters of the book. The author has identified five yangs, which housebear the drisors of mouth.

book. The author has identified five yangs which have been the drivers of gowth. They are agricultural land reforms and markets, special economic zones, real estate and urbanisation, policy and infrastructure and entrepreneurship. He has identified five yins as the cost of growth. These are debt, corruption, geopolitics, demographics and environment. However, there is so much information and research on the properties of t information and personal opinion packed into each of these aspects that reading becomes daunting and exhausting. The occonies daiming anternatusing. The author also seems to lose the primary argument in the welter of fact and his own opinions, making it difficult to understand what he is trying to convey. The conclusions are mostly accepting of everything that the Chinese government had pushed as a narrative.

OFF THE GRID

AJAY KUMAF

had pushed as a narrative.

One needs to accept that though India and China are Asian nations with superficial civilisational similarities, the social realities of the states are very different. Indian governments have had to look for ways to manoeuvre within the vast differences. India being a democracy has always had to be accommodative of people's

of people's demandsand aspirations. Indian aspirations. Indian governments are answerable to the people and thus the policies also have to cater to their demands. On the other hand, China

DRAGON

as a Leninist Party state looks at dissen and challenges in a different fashion. It does not face elections and is thus not put to the test every few years. It has also had a history of suppressing dissent militarily, the most recent being the 1989 Tiananmen Square. After reading the book one craves for some critical analysis,

The other consistent argument he makes is that since 2014 Indian policy and planning have been better because it has

not just narration and opinion.

planning have been better because it has been ruled by a majority government. The author also argues that the coalition governments have not achieved much compared to China during the same time period. He writesthat, "During the coalition era in undid and thin the BRAGON: windid and thin the BRAGON: windid and the BRAGO DANCE OF THE ELEPHANT,

now maia and China are Reshaping the World in Different Ways Author: Sandeep Hasurkar Publisher: Rupa

> leaders' relatively long tenures and authority, as well as the consistency of

diluted the intent, effectiveness and implementation of the reform programmes' opportunities. This contrasted

authornty, as well as the consistency of policy intent, experimentation, speed and implementation in the Chinese economy during the same period."

These assumptions indicate the lack of a nuanced understanding of domestic politics and social realities of India as well

as China. As a result, it seems to be in awe ofwhat China as a muthoritarian state has managed to achieve. It is now central toglobal supply chains. It cannot be denied that China has successfully managed to life millions out of poverty. But the question that looms large is at what cost. When we discuss economic growth and achievements, should we not look at the cost paid by the people in the form of human rights violations, income and gender dispartites, and environmental degradation?

The author attempts to provide a as China. As a result, it seems to be in awe

environmental degradation?
The author attempts to provide a parallel for similar events in both countries. However, when one is trying to understand India and China, one needs to acknowledge that its impossible to acknowledge that it is impossible to acknowledge and refrain from predictions. This is on account of the very same thing the author talks about at the beginning of the book — the contrasting histories of the two nations. Though the book provides a range of information, the lack of comprehensive analysis detracts from its value.

There is a Ring of Truth to Tariff Hike

Telcos can now invest in game-changing 5G

India's telecome companies, among the firerest price war-riors, have finally seen the light. They are raising tarriffs, hoping Indians hooked on to prodigious amounts of data at dirt cheap rates won't be able to kick their browsing habit. It is a calculated gamble by Reliance Jio, Bharti Airtel and Vodafone Idea to raise revenue per subscriber to fund network expansion. The industry has it slightly section after. Gel Helpin that allowed the numbrase of easier after a Gol lifeline that allowed the purchase of spectrum in instalments. Yet, spectrum prices remain high while its telecom tariffs are among the lowest in the world. Hyper competition has squeezed telecom compa worm, ryper compension as squeezed relecting companies to a point where Vodafone Idea had to bring on Gol as a shareholder to pay its dues.

The concerted price hikes are a sign the industry is gain the concerted price hikes are a sign the industry is gain.

ning health. The competitive intensity earlier was diffi

cult to sustain and was acting perver that India is a market for three tele-com companies if not four Plansto re-vive state-owned BSNL will put the in-dustry on a firmer footing. And it will better serve Gol's agenda of a digital price increases are calibrated to main-serion from 2G to 4G sely to push telecom services towards a duopoly. The industry and GoI agree that India is a market for three tele-

India. The recent price increases are calibrated to main-tain the tempo of subscriber transition from 2G to 4G

tain the tempo of subscriber transition from 26 to 4G networks. The sticker shock is not that intense for data-hungry 5G subscribers. India 'sdevelopment relies extensively on rapid telecom network upgradation. With population-level cellphone usage, Gol and businesses are building impressive digi-tal stacks on the telecom backbone. The industry faces heavy investments in terrestrial and satellite networks It needs to find a way to finance these investments from internal resources. The price revisions suggest that the frenzy for subscriber addition has abated, and telecom companies are looking at the game-changing model 5G represents, where machine-to-machine-communication ushers in a new industrial revolution.

Do Crowded Lives in India Matter At All?

Even in the best of times, keeping a queue in India is challeng-ing. In the worst of times, we get life-taking stampedes. This ing, in the worst of times, we get life-taking stampedies. This reality is far too often over-looked when approving large public gatherings, as evidenced in UP's debacle at Hathras on Tuesday, Over-120 people—mostly women and children—less their lives while attempting to follow a godman and reportedly collect dust from his car's tyre trail after a softsang ended. An FIR has been registered against the organisers. In other words, an attempt is being made to close the stable door after the horse hose botted.

District officials reportedly granted permission after orga-

District officials reportedly granted permission after orga-nisers understated numbers to evade restrictions and enhan-ce Rois. No worst-case acenario prop was conducted. 70 police personnel were said to have been deployed for what turned out to be 2.5 lakh people. There was no digital surveillance employed to monitor crowd-density and potential bottlenecks, no am-bulances no medical stations. Forty and

bulances, no medical stations. Entry and exit points were poorly marked, with a large pit nearby. Third-world conditions don't sit pretty with world ballucinations.

first-world hallucinations. India, a crowded nation that should take extra measures, not less, has sadly witnessed far too many crowding accidents. It's ironic that such anarchic conditions in religious gatherings contradict the very safety tranquillity and, indeed, comfort that faith is supposed to provide metaphysically. There is no rea-son why physical surroundings at congregations should give a down to be use a safety or lines that does in extractly conditions. damin to human safety or lives that design, orderly crowd management, and effective supervision and communication can provide. It's not rocket science, as the successful handling of Kumbh melas after years of regular tragedies proves. Let Indian lives matter in smaller gatherings too.

Eerie Parliamentary Activity is Such a Hit

Parliamentary Activity (PA) — much like the Paranormal Activity series of supernatural horror movies created by Oren Pell — is bona fide creeps Which, as faras its achiock value goes, means that PA has become downright entertaining. Jump-scare moments like characters going on a rampage identifying who is lindu and who's not, questions being posed whether parasities in allances are the new zembles, and strange sounds of 'childish whinings' detected.... These all make for great popcorn bowl-turning appeal. If Paranormal Activity is about a house haunted by an evildemon, Parliamentary Activity is about a House baunted by demons in the attic that keep coming down when parliament is in its usual séance session. The eerie bit is that while all this keeps us entertained, the boring bits—debating issues, discussing legislation, etc.—quice ly happen or don't, if really doesn't affect the narrative. At its most intense, PA works so well by resorting to having long periods of utter inaction, and then sudden unexplained, irrational flurries of activity that make all the waiting in inaction so worth it. Bills get passed as lews unyset as in the sudden unexplained, irrational flurries of activity that make all the waiting in inaction so worth it. Bills get passed as lews unyset and the parameter of the properties of a lews unyset as in the second of the properties of the

passes, trational unitries or activity that make all the waiting in inaction as owerful. Billing et passed as laws mysteriously, Issues are 'debated' that have little consequence to life in daylight. The agricultural landscape can be transformed by digital initiatives like Open Network for Digital Commerce (ONDC) and Notional Agricultural Martiset (e-NAM). These platforms mover farmers by connecting them directly to markets, eliminating expositative middlenen. By strengthening and promoting these platforms the badget can ensure better market access and, hence, fairer prices for farm produces.

Prayer is A Device

Avoidable tragedy

Gatherings should be tightly regulated to prevent Hathras-type stampedes

To prevent Hattinas-type stampedes

he stampede on Tuesday at a religious congregation at Hathras in western Uttar Pradesh, claiming over 120 lives, is only the latest in a series of such tragedies in the country. There have been at least half-a-dozen such incidents in the last 20-odd years. In this instance, at least a lakh of people focked to Futral village to listen to an address by a preacher Sural Pal, also known as Narayan Sakar Hari or "Bhole Baba". There are reports that there were over 2.5 lakh participants at the venue, which could accommodate no more than 80,000. The preacher is said to have followers in States such as Madhya Pradesh, Rajasthan and Haryana too. Most of the detate in time time to do to the preactive is said to have followers in States such as Madnya Pradesh, Rajasthan and Haryana too. Most of the decased, mainly women and children, were from the economically vulnerable sections of society, and were in search of spiritual solace. While only a fair investigation can find out the cause for the stampede, the reasons being cited include overcrowding, and the bid by some to collect soil from around the feet of the preacher. Not surprisingly, the responses, particularly from the feld-level public health system, have exposed how illiprepared the Ultar Pradesh administration is. Visuals of boddes lying outside the place of post mortem and of the kin desperate for help, as well as an inadequate number of ambulances and medical staf have become the common features of such tragedies. What has made it worse is the preacher and his aides reportedly leaving the site even as panic-stricken people were dying.

The most tragic aspect, as seen in the past, is

The most tragic aspect, as seen in the past, is that it was all avoidable had there been proactive steps taken by a vigilant administration. Unfortu nately, the authorities in many States do not ap pear to have learnt lessons or made use of the availability of better technology and communication. Apart from stringent action against those responsible, the U.P. administration should ensure a just compensation package, the cost of which has to be borne by the organisers. The traged via a classic study in the management of large crowds. The ofcials concerned should ensure that the organisers have the wherewithal to handle large gatherings of any size. The local authorities and organisers should also conduct a drill ahead of such events. What is more important is that the political executive, the bureaucrap and organisers of any public event should be conscious of the fact that the loss of a life is a tragedy for the person's family. The arrangements for mass functions should be governed by this fact. pear to have learnt lessons or made use of the

Of accommodation

Treasury benches and the Opposition must uphold parliamentary tradition

he frst session of the 18th Lok Sabha and the corresponding session of Ralya Sabha were notable for the renewed spirit of parliamentary debate on display, notwithstanding the excessive combativeness and avoidable grandstanding by the government and the Opposition. Echoes of the election campaign continued too, as Rahul Gandhi, in his debut as the designated Leader of Conosition (LoP) mounted as signated Leader of Opposition (LoP), mounted an aggressive critique of the NDA government and Prime Minister Narendra Modi. Mr. Modi in turn called into question the track record and inten-tions of the Congress, and Mr. Gandhi's capacity. called into question the track record and intentions of the Congress, and Mr. Gandhi's capacity.
Both sides categorically declared fealty to the
Constitution of India, while accusing each other
of trying to undermine it. They also crossed
swords over Hinduism and its political role. The
rise of a strong Opposition — with no designated.
LoP earlier — and the return of coalition politics
as the leading party lacks an absolute majority
may restore the role of Parliament. The increase
in Opposition numbers can help restore healthy
traditions such as more Billis getting scrutinised
by parliamentary standing committees. A robust
Opposition can also act as an efective restraint
on the government, preventing it from buildozing opposition with its legislative agenda. The
Tifth LoK Sabha not only earned the dubious distinction of having seen the suspension of the
most number of Opposition MPS (146 in a single
session, including Rajya Sabha MPs) but also
functioned without a Deputy Speaker, a post
functioned without a Speay to Speaker and the
functioned without as support for Om Birla as the Speaker only on the condition that the government agreed to ofer it the deputy chair. The stalemate eventually led to an election between Mr. Birla and Kodikunnil Su-

an election between Mr. Birla and Kodikurini Suresh (Congress), which Mr. Birla won through a voice vote. The Opposition did not press for a division and rich parliamentary tradition was folwed, with Mr. Modi, leader of the House, and Mr. Gandhi, LoP, escorting Mr. Birla to his Chair. The roles of the LoX Sabha Speaker and Rajya Sabha Chairman gain additional prominence. The Opposition has urged them to be even-handed. The Opposition has urged them to be even-handed. The Opposition of Mr. Gandhi's speech from the records by the Speaker. The threshold for removing parts of what is spoken in the House from focial records should be very high. Following ofcial records should be very high. Following the deviation from the standard format by several the deviation from the standard format by several members, the Speaker has constituted a committee to frame rules for oath-taking. Parliamentary speeches could do with more humour and less diatribe, but the fact that there was an expanded debate is encouraging. The Treasury and Opposition benches must understand that their place in the highest seat of democracy is to represent the people who sent them there. They must find a common sense of purpose and function in a spirit of accommondation.

Trials, medical ethics and the orbit of power

n January 10, 2021, Rashida Bee (representing the Bhopal Gas Peedit Mahila Stationary Karmchari Sangh), Nawab Khan (representing Bhopal Gas Peedit Mahila Stationary Karmchari Sangh), Nawab Khan (representing Bhopal Gas Peedit Mahila Purush Sangharsh Morcha), Rachna Dhingra (representing the Bhopal Group for Information and Action) and Nausheen Khan (representing Children Against Dow Carbide) wrote a letter to Prime Minister Narendra Modi and the then Minister of Health and Family Welfare, Dr. Harsh Vardhan. In the letter, they alleged irregularities and ethical violations in the conduct of the clinical trial for Bharat Biotech's Covaxin (a COVID-19 vaccine) by the People's Hospital in Bhopal, Madhya Pradesh and the resultant exploitation of trial participants n January 10, 2021, Rashida Bee resultant exploitation of trial participants belonging to vulnerable groups demanding stoppage, punishment and compensation.

The letter further alleged gross violations of ethics guidelines including violations of informed consent procedures, enrolment of vulnerable

consent procedures, enrolment of vulnerable population among study participants, non-reporting of adverse events and a lack of monitoring and follow-up of study participants among others.

The writers sought urgent intervention to stop the study at the trial site and for investigation by an independent body. What became of the letter and any consequential actions are unknown. The Indian drug regulator, Central Drugs Standard Control Organisation had approved the vaccine candidate prior to the completion of the recruitment for the vaccine candidate prior to the completion of the recruitment for the vaccine candidate prior to the completion of the Clinical Trial Mode"—a term and process that finds no mention in India's Drug Regulatory Framework, the Drugs and Cosmetics Rules, 2019.

Ethics committees and whistle-blowers One of the issues that stands out in this case is the functioning of the trial sites and their respective ethics committees. Dr. Jacob Pullyel, a member of the National Technical Advisory Group on Immunization (NTAGI) fled a writ petition in the Supreme Court of India where the Court said "subject to the protection of privacy of individual subjects and to the extent permissible by the 2019 Rules, the relevant data which is required to be published under the statutory regime and the WHO (World Health Organization) Statement on Clinical Trials shall be made available to the public without undue delay".

The development of potential therapeutic agents is often complicated by subjective and sometimes objective violations of ethical guidelines. The role of conscientious insiders, and sometimes outsiders, who have unique One of the issues that stands out in this case is the

and sometimes outsiders, who have unique knowledge of such violations is the subject of a recent book, The Occasional Human Sacrifce – Medical Experimentation and the Price of Saying No, by bioethicist, philosopher and whistle-blower at the University of Minnesota Carl Elliott. The book details several such

Dinesh S. Thakur a public health activist and was the whistle-blower in th

case against Ranbaxy Laboratories

incidents in the western world, starting with the Tuskegee Syphilis Study to the Willowbrook Hepatitis Study. It also looks at what happened with Protocol

It also looks at what happened with Protocol 126 for cancer study of bone marrow transplantation at the Fred Hutchinson Cancer Center and at the Eugene Sanger Radiosloope Laboratory, Cincinnatl Medical Center, to study the efect of radiation on humans among others. Driven by his own experience to understand the suicide of Dan Markingson at the university, Elliot traverses some very diffcult and human questions such as what makes someone speak out the entire followers. out, the ethics of dissent, honour, respect, guilt and shame, and the concepts of dignity and integrity told through the journey of whistle-blowers. As Nancy Olivieri, a whistle-blower, recounts in her review, threats of legal action and, worse, often resulting in destroying the whistle-blower's life are far too common in such cases.

While one often wonders why such instances of moral courses are few and far between in our society, Satyendra Dubey, Shanmugam Manjumath, Sanjiv Chatunvedi and a few other named exceptions notwithstanding, lack of strong whistle-blower protection statules is only a part of the protolem. Unlike the United States, India does not have a law that protects those who take great personal risks to bring wrongdoing to public notice. The existing law, whose scope is limited to public servants to begin with, was further diluted in 2015, making it a dead letter law. While one often wonders why such instances

law.

The deeper issues which we should, but do not wrestle with are: understanding group think and organisational wrongdoing, loyalty to the ivory tower, fear of retribution, social conformity, tower, leaf or featbook, society, leaf or severises of power that are so ingrained in us as a society. Unless we study these traits among us as a society, we will never understand why someone chooses to be an Anand Rai, the whistle-blower who exposed the

Innovative therapies and ethics
Back to the topic at hand, i.e., the development of
life-saving medicines is a morass in our country.
While we have a vibrant industry that
manufactures generic (copy-cat) drugs,
developing innovative therapies has not been our
cup of tea. Development of life-saving medicines
often entails balancing the risk to the patient with
the projected benefit from using the therapeutic
candidate. In most cases there is not enough candidate. In most cases, there is not enough data to make an informed decision, which is not straightforward and requires specialised knowledge and experience. Using an approved drug that is on the market does not qualify a medical doctor to make such decisions. Drug development is a separate area of expertise While we see green shoots of late, we do not have deep expertise in managing clinical development. Therefore, we make do with appointing medical

doctors to oversee the development of therapeutics. This requires better guardrails than we have in order to ensure that the basic tenets of we have in order to ensure that the basic tenets of ethics are not violated in the process. For example, when medical doctors who specialise in treating individual patients with specific diseases such as cardiology and paediatrics are appointed to run our pandemic response, we see absurd actions such as projecting cases to become zero during the COVID-19 pandemic. Members of subject expert committees make up things such as "emergency use authorization in clinical trial mode" and work hard to justify it with a straight face. These are glaring examples of gross face. These are glaring examples of gross violations of medical ethics in our recent past

Indian patients and clinical studies

The bigger issue in our country is the historic and repeated violation of informed consent when patients are enrolled in clinical studies. More than anecdotal evidence exists that poor and uneducated people are enrolled in such studies uneducated people are enrolled in such studies without fully informing them of potential harm from the therapeutic candidate being evaluated in a clinical study. The job of ensuring such atrocities do not occur falls to what is called an institutional ethics committee. While such committee sixth or paper and in our regulations, their function and efectiveness are at best

then including and electiveness are at best patchy.

A publication (2022) by Gayatri Saberwal et al. in the journal PLOS Global Public Health that evaluated 1,359 Phase II or III interventional studies registered in the Clinical Trials Registry-India (CTR) identified as many as 30 problems with the way in which our ethics committees function. These include clinical trials without any ethics committees, and trials with more sites than functional ethics committees. for example, three ethics committees approving one study site. The simple takeaway from this one study site. The simple takeaway from this ranalysis is that the primary guardrafts that are supposed to be a check on abuse of medical ethics do not function in our country. This analysis says nothing about the competence of the members of the ethics committees, which was plainly obvious during the development of Coronil during the pandemic. The biggest abuse of these regulations is a section of the industry that is actively promoted by the Ministry of AYUSH. These poorly designed, ill-executed "clinical studies" with zero oversight are often used to provide a veneer of scientific validity to their concoctions and nothing more. If there is one message that comes out clearly

If there is one message that comes out clearly in Elliott's book, it is how even well-designed and well-run systems of checks and balances on accountability are often run roughshod over by those who have the means and power. We are nowhere even close to how such systems function in the West. If we truly wish to hold wrongdoing to account, we have a very long way to go before we even get the basics right. That is, if we truly want to.

Factory accidents, a pointer to rusty inspection reform

n explosion of a reactor in a chemical factory in the Dombivil Maharashtra Industrial Development Corporation (MIDC) are an May 2024 resulted in the loss of lives and injuries to workers and people. It also caused damage to factories, shops and residencies in the neighbourhood. The Maharashtra government amounced compensation to the kin of the deceased and funds for the treatment of the injured. Newspaper reports show that fatal industrial accidents were frequent in 2016, 2018, 2020 and 2023. The Maharashtra government is guilty of not relocating 156 chemical factories in the Dombivil MIDC area even after "deciding" in 2022 to relocate them to Patalganga. It is now known that the bolier in the chemical factory was not registered under the Indian Bolier Regulations, 1950.

Poor inspection
In 2021, in Maharashtra, 1,551 of 6,492 hazardous factories were inspected, i.e., a 23.89% inspection rate. And, 3,158 out of 39,255 registered factories were inspected, i.e., an 8.04% inspection rate. The situation is no better in two other top industrial States. In Tamil Nadu, the general inspection rate was 17,04% and the hazardous factories inspection rate was 25.39%. In Gujarat, it was 19,33% and 19,81%, respectively. The all-India fgure, of 14,65% and 26,02%, respectively, is not surprising (the data are from the Directorate General Factory Advice Service & Labour Institutes report, 2022). The poor inspection rates could also be due to

The poor inspection rates could also be due to a shortage of personnel among other reasons. In Maharashtra, the appointment rate is just 39.34%; 48 out of the 122 sanctioned ofcers were appointed. The numbers are better in Gujarat (50.98%) and Tamil Nadu (53.57%). The all-India fgure was 67.58%. Even the sanctioned posts relative to the number of registered factories have

of the same kind of industrial

disasters

In India, the primary

guardrails that

be a check on the abuse of

medical ethics

do not function

are supposed to

been inadequate to ensure that every factory is inspected in a year. For example, for an all-India reach, each of the 953 sanctioned inspectors would have had to inspect 337 registered factories in a year, in 2021. The inspection rates are poor because of the heavy workload of the inspect 318 factories in a year, 589 in Gujarat, 532 in Tamil Nadu, and 499 at the all-India level. The prosecution seciety is the number of prosecutions decided as a percentage of total prosecutions (including pending cases) was 6.55% in Gujarat; 13.84% in Maharashtra, and 14.45% in Gujarat; 13.84% in Maharashtra, and 14.45% in Tamil Nadu. As a result, inspections lose their Tamil Nadu. As a result, inspections lose their "deterrent efect". From the data, it is clear that labour market

governance through the labour inspection system is weak and does not perform efciently. However, employers call it pejoratively as "inspector-raj", implying harassment and prevalence of compromising practices such as bribes.

Need for the right reforms in inspection
The criticism is not without merit. Given the vast

The criticism is not without merit. Given the vast universe of inspection, the inspectors may "target" and 'harass' several factories/establishments, exhibiting state power and also attempting to secure bribes. But this cannot be universal as the statistics are telling. The president of the Maharashtra Industry Development Association has admitted, in a media report in May 2024, that in many cases, safety inspection and certification were done 'on a 'understanding' between the auditors and an "understanding" between the auditors and factory owners or managers". Employers are as guilty as the labour inspectors, and tackling the "supply side" of "rent seeking" is as important as reforming the "demand" side.

Reforms of the inspection system are necessary but not of the kind initiated in most States in response to employer criticism

Self-certification, randomised inspections, online inspections, and third-party certification have been introduced by ruling political parties at the all-India level and in many States. These changes violate several articles in the International Labour Organization's Labour Inspection Convention

Organization's Labour Inspection Convention (081), 1947.
According to the Convention, there must be sufcient qualified and well-provided inspectors and they shall enter the establishments freely and without prior notice at any time to secure due compliance of the labour laws, among others. Instead of liberalising the inspection system, governments must ensure a strong labour market governance by implementing the provisions of the ILO Convention. Given the fast-paced changes taking place in technology, and the use of taking place in technology, and the use of hazardous and chemical substances, the nazardous and cnemical substances, the increased need for inspection is felt. Inspectors can both "inspect" and "facilitate" due compliance of laws by providing suitable advice to employers and unions. This is recognised by the ILO Convention.

Penalties for the enforcer

Penaltics for the enforcer If a fmr or a trade union does not comply with laws, they are proseculed by the state. If the state fails in its governance what is the penalty the state, wiz the government and the labour department ofclais pay? Simple and meagre compensation to the victims and their families? No. There must be a penal system for the enforcers also which will pave the way for complete legal compliance.

The recurrence of the same kind of industrial disasters shows a lack of learning by the government. In the name of reforms and a lean

government. In the name of reforms and a lean government, the state cannot abrogate its fundamental duty — to ensure a safe working and living environment. It should carry out meaningful reforms to ensure an "efcient" and "ethical" labour inspectorate

reforms in the inspection process

In Parliament The abrasive exchanges The abrasive exchanges between the Congress and the ruling Bharatiya Janata Party have certainly lowered the dignity of Parliament (Page 1, "PM says mandate is for continuity, Cong. a 'parasite' on allies', July 3). The Prime Minister, given his seniority, should have shown some consideration

for fellow members instead of bulldozing them. No MP should forget that a strong Opposition, which has been Opposition, which has been missing for a long time, is essential for a healthy democracy. The BJP failed to win the required number of seats and must introspect over this.

P. Sanath Kumar, Visakhapatham

The Prime Minister's speech did not have answers for the points raised by the Leader of the Opposition or the other Opposition leaders, Instead, it was focused on levelling accusations and ridiculing the Congress. The Prime Minister's claim that the 2024 mandate is for continuity needs to be

clarified. The continuity is certainly not for such incongruent and hate speeches to continue even after the election is over.

The BJP too was not given the mandate to rule on its own strength. The leader of an august house is expected to be conscious of the

House must get back on course

Opposition has a right to be heard, but should also recognise its responsibility to listen

he first few sittings of the 18th Lok Sabha, and the new session of Parliament do not augur well for things to come. One of the big messages was that there was no meeting point for the two sides, nor even the vaguest of attempts by the Opposition to listen to the Prime Minister after their own representatives had spoken at length with few interruptions. This is worrying, Ahead of the session, it was clear that an evenly poised House, albeit one where the NDA government

has a clear majority in the Lok Sabha, would test the floor management skills of the treasury benches (until now, accustomed to a position of strength arising from their overwhelming numbers), but also invigorate the legislative process, adding teeth to important House panels.

But the way the debates in the first session of the House have gone, there is merit to the Prime Minister's (PM) comment in the Lok Sabha that though the Opposition's "ecosystem is spending day and night trying to convince people that they have defeated us", he continues to remain in power, The Opposition MPs incessantly booing when the PM spoke in the Lower House, and then choosing to walk out in the Upper House also did not reflect well on a coalition that fought on a common platform to win sizeable representation in the same House it was now disrupting. Its numbers mean that it has a right to be heard, but the government's numbers mean

that it also has to listen.

Over the last month, the government has been keen to project that it is business as usual, both in terms of policies and personnel — and the fact that most of the Cabinet and even the Lok Sabha Speaker have been repeated, accentuates this impression. Meanwhile, the Opposition has been equally keen to flex its numbers, now higher than at any time in the past decade, to show it can now hold the ruling dispensation accountable, perhaps even block

legislation.
It remains to be seen if the sound and fury of the opening gambit will set the template for the next five years. The bottom line is that respect for the opponent is necessary to engage productively in Parliament, and there wasn't much of that on display. If the aggression on view over the past few days was a hangover of the nearly two-month-long bitter cumpaint it must ness before some must bitter campaign, it must pass; better sense must prevail. Parliament needs robust debate and disagreement, but it cannot function meaningfully without the decorum and dignity that make it a true temple of democracy.

Hathras tragedy and the failure to learn from past

The stampede at a religious congregation in Hathras, Uttar Pradesh, on Tuesday that left 121 dead is yet another instance of administrative inertia compounding the risks from poor organisation. The satsang organisers failed on many counts — from anticipating the size of the crowd to having adequate exit points and medical arrangements. Holding the satsang in a tent amid oppressive humidity and with grounds slippery from the rains escapes conventional wisdom even when a the rains escapes conventional wisdom even when a gathering of 80,000—the crowd size the district administration had permitted—is considered, let alone the reported 100,000 who turned up. The offenders must be brought to book. A case has been filed against close aides of the godman at the centre of the sustaing. But the latter, who goes by the names of Bhole Baba and Narnyan Sakaar Hari, hasn't been named in the FIR. This raises many questions, seven several other needing cases against him. given several other pending cases against him. Many recent accidents were rooted in similar

Many recent accidents were rooted in similar, failures to enforce safety protocols. Just last year, the roof of a stepwell in a temple in Madhya Pradesh collapsed from the weight of visitors who had gathered for Ram Navami celebrations. A probe flagged poor crowd outrol and the illegally constructed roof. The tragedy occurring many months after the local administration ordered the removal of the roof underscored administrative failure. The country has been in this territory multiple times, where large numbers gather for congregations and political rallies, and poor crowd control and the failure of the authorities to monitor organisers leads to disaster. In the Hathras incident, the officials who should have ensured safety compliance have as much to answer for as the organisers.

AFTER THE STAMPEDE

Hathras tragedy should lead to setting down of careful safety protocols. UP government needs to do more

TTAR PRADESH CHIEF Minister Yogi Adityanath has announced that a re-tired judge will probe Tuesday's deadly stampede at a satsang (religious congregation) held by a self-styled preacher in Hathras. The investiga tion will "pinpoint lapses" and the culprits won't be spared, he has said.

Accountability for the incident that claimed more than 120 lives and left at least 300 migured must be fixed urgently. Initial reports indicate that the crowd gathered to hear the godman, Bhole Baba, far exceeded the estimate the organisers gave to the district administration. Many devotees tripped while trying to collect the soil the self-pro-claimed preacher had walked on. There is no doubt that the satsang's organisers must be held to account. But the state administration would be mistaken to assume that its role in a mass event, even if privately organised, is limited to issuing permissions and providing security. Along with the organisers, the onus is on state authorities to enproviding sectings, many grantine organization and so in state and interest or in the state of t not happen again.

Authorities must be stringent about the size of a gathering. However, the administrative and police machinery is not always equipped to ensure that the crowd does not swell beyond the sanctioned numbers. In such situations, the number and placement of exist at the event are crucial, as are real-time interventions to ensure that religious or cultural fervour does not imperil public safety. Healthcare facilities should be kept on alert. By all accounts, many of these boxes were not ticked at Hathras. Safety, it is now apparent, was not a priority for the organisers of the satsang and the administration did precious little to nudge them to take the necessary precautions. The devotees had gathered in a makeshift tent, pitched on a field made marshy by the rains. The terrain cused many to slip and the humid weather made matters worse. The narrow exit routes at the satsang site, partly the humal weather made matters worse. The narrow exit routes at the satisang site, partly blocked by welicles, were insufficient to evacuate the panicinist, growd. The nearby hospital was hard-pressed to handle the influx of injured people. Several doctors were reportedly not at work and the healthcare facility did not have oxygen cylinders to support people suffering respiratory distress.

Religious gatherings, festivals, weddings and functions that draw large crowds are a

regular part of the cultural, political and religious calendars of almost every district, or even neighbourhood, in the country. Hathras is a lesson — such gatherings are susceptible to panic-inducing triggers. The tragedy should push policymakers to evolve safety-related protocols. The Adityanath government which uses Section 144 to restrict people's gatherings on occasions as different as the farmers' protest to religious festivals should reflect on its failings in Hathras. A government that takes pride in organising the Kumbh should do better than merely smelling conspiracies. It — and other authorities across the country — must ensure that mass gatherings do not turn chaotic and take such a high toll.

Rajeswari Sengupta

WITH A NEW government at the Centre, the economic policy discourse has now shifted to speculating about the Union Budget for 2024-25. This year's budget is especially important for one specific reason. In an unexpected tumo fevents, the RBI announced last month that it is transferring a sizeable dividend to the government significantly more

portant for one specific reason. In an unexpected turn of events, the RBI announced last month that it is transferring a sizeable dividend to the government, significantly more than what was anticipated. This has triggered much discussion about how the government can spend this windfall. We need to ask a more fundamental question: Should the government spend it at all?

Fiscal management should be guided by two general principles. First, deficits should be kept at prudent levels. In India, that level should ideally be around three per cent of CDP for the Centre according to the long-standing liscal Responsibility and Budget Management (FRBM) Act. Second, governments should spend a bit more than this norm when the economy is doing badly and a bit less when the economy is doing badly and a bit less when the economy is dost government needs to step in and boost demand to prop up the economy. The needs are reversed when the economy starts to recover. As private demand revives, the government needs to curtail its spending less overall demand areas ahead of supply, fostering inflation. A critical aspect of this second principle is that policies must be symmetric. Larger-than-normal deficits need to be followed by smaller-than-normal childs in second principle is that policies must be symmetric. Larger-than-normal deficits need to be followed the second principle is that so start in the principle is that so start is why these principles are followed in prudent countries all over the world.

But not in India. Here, governments have always struggled to spend within their means, irrespective of whether the economy 2000-01 to 2019-20, the average fiscal deficit

of the Centre was 4.6 per cent of GDP, much higher than the three per cent medium-term target set by the FRBM Act.

During the pandemic, the deficit shot up to 9.2 per cent of GDP in 2020-21, a large increase but a reasonable one, considering the size of the shock to the economy. But curiously even after the economy recovered, the deficit has been slow to come down. In the Interim Budget presented earlier this year, the finance Minister amounced that the government of the size of the short of the size of the short of the size of

be a mistake.

The general sentiment in India seems to be that any spending on capex is great news. This is not correct. Look at China, for example. As part of their infrastructure building spree, they built two to three airports in the same city and are now struggling to repay the debt that was incurred for these projects. What is

therefore needed in India is to calculate how much capex is truly needed and of what kind. Governments spend on capex for two reasons: To stimulate growth and to meet the needs of the economy, Let's address the second criterion first. Infrastructure in India is definitely a problem that needs to be solved, but not all at once. Since the pandemic, the government's capex spending has been growing at an average annual rate of 30 per cent. It is not obvious that this pace needs to be increased, or even sustained. On the contrary, recent developments demonstrate that the speed of construction – and focus on new projects, rather than maintenance – has serious downsides.

In addition, not all capex is essential for

rious downsides. In addition, not all capex is essential for In addition, not all capex is essential for growth. For example, using Rs 16 falsh core to revitalise telecom MTML and BSNL is surely not critical, especially when affordable cell-phone services are being provided through-out the country by private operators. Likewise, it is not obvious that spending lakths of crores on bullet trains can be justified in a country whose per capita income is less than \$2,500. Regarding the first criterion, we have to ask the question again: Why does the government need to stimulate an encomny that is doing so well? Given the strong conomic perform-ance, it should instead use the surplus divi-dend from the RBI to bring the fiscal deficit down closer to three per cent.

dend from the RB to bring the fiscal deficit down closer to three per cent. There is, however, a caveat to this discus-sion. And this relates to the true state of the Indian economy. What if the economy is actu-ally weaker than what the 7-8 per cent growth figures suggest? Then there may be a case for the government to keep spending to support the economy. There seems to be alack of consensus on

There seems to be a lack of consensus on this fundamental point. If the economy is not doing very well, then we should not be surprised if the budget uses the surplus dividend to announce a further increase in infrastructure spending.

THE DRAVID STORIES

They speak of the little big things that made him a World Cup winning coach

IRENDER SEHWAG TELLS a story about Rahul Dravid from his playing days that captures the essence of the coach he would later become. The first time a young Sehwag was getting ready to open the batting in a Test at Lord's in 2002, he saw Rahul Dravid, slated to bat at No 3, already ready. with his pads on. "You won't give me time to put pads on", remarked Dravid. The chronic risk-clare? Selway went on to score 84 that day, After that innings, to put the team's opener at ease. Dravid depan to wear his pads only after 54 wheng, it was Dravid who flought hard with the selectors to keep faith in the out-of-form ODI opener Selwag during his captaincy in the mid 2000's. And Dravid, again, who encouraged pacer Zaheer Khan's comeback in

the middle of the career:
It's in these little big things that the strength of Dravid's reign as a World Cup winning coach lies. Of not imposing his own philosophy on the players, but allowing them to grow on their own, and stepping in when needed. When Shubman Gill's position was at stake in Tests earlier this year against England, Dravid had to tell the young opener that he tould be let go after that Test. But the way he approached the situation — reminding Gill about his talent, what's needed of him, and how the worst-case scenario of playing in Ranji Trophy wasn't as bad as its seemed — relaxed the opener enough for him to return with a hundred. As Suryakumar Yadav told this newspaper, Dravid's pre-World Cup presentation that the state as exercit like this hat was the above some constitution.

hundred. As Suryakumar Yadav told this newspaper, Dravid's pre-World Cup presentation told the team, essentially, that he trusts the players to know what's best. "Leave everything else to us, you guys go enjoy" were his words that put the team at ease. It might have been Robit Sharma who triggered the all-out attacking batting philosophy after the 2023 ODI World Cup, but he has shared with this newspaper how Dravid trusted and nurtured him. Legendary players seldom come without ego, but Dravid has a self-deprecating way. When the coach's selflessness and vision is not in doubt and when players don't feel their territory is being cramped or encroached, it's not a surprise that seniors and juniors combine as well as they did in winning the World Cup.

A Greek week

A new law wants people to work for six days out of seven. But to what end?

ACK IN 1930, when John Maynard Keynes predicted that within a hundred years, most people would be working for 15 hours a week, did the economist imagine how wildly wrong he would be? Not that there haven't been stalwart efforts by certain European countries, like Spain, Belgium, Germany and Iceland, to experiment with encouraging workers to have a life outside work and find meaning in other avenues and pursuits. But even as these places institute the four-hour work week, the pull in the opposite direction —of overwork and constant hustle in pursuit of the corporate profits at the end of the rainbow — remains strong as ever.

The most recent illustration of this is Greece's new six-day work week legislation

which, Prime Minister Kyriakos Mitsotakis hopes, will help boost the national economy's productivity. That he has described the initiative as "growth-friendly" (a phrase about as productivity. That it is a security of the initiative as governmently (a pinase about as the meaningful as other business) jargon like "personal development" and "self actualisation") should be enough to set alarm bells ringing — as indeed they are, with Greek workers wondering what will happen to their hard-won legal protections in a country that already has the longest working hours in Europe.

ready has the longest working itsouls in Laurope.

The larger question confronting Greece, and the rest of the world, is this: Productivity, yes, but to what end? With the proliferation of "bullshit jobs" — characterised by anthropologist David Greeber as those which could disappear and leave the global economy uterity unaffected — it has become harder and harder to tell what work matters and what doesn't. Should workers really have to give up more of their shrinking leisure time to fill up reimbursement forms and sit in meetings that could have been emails? For Greece—
as indeed for others—it might be useful to go back to what Aristotle once said, that "the
end of labour is to gain leisure". A six-day work week puts paid to any hope of the latter.

Answer Is A Question Bank

It can address problem of paper leaks, ensure transparency in evaluation process

Vinay Sahasrabuddhe

THE NDA GOVERNMENT has rightly ap-

THE NDA GOVERNMENT has rightly appointed a committee under the leadership of Koppilli Radhakrishna, former chairman of the Indian Space Research Organisation (SRO) to "make recommendations on reforming the mechanism of the examination process and improving data security protocols and the structure and functioning of NTA (National Testing Agency)". It was also courageous of the Education Minister Dharmendar Pradhan to bite the bullet and unhestatingly cancel the UGC-NET examination after investigations unearthed some wrongdoings.

The obvious question is: "What next?" The answer lies in the NEP 2020. It clearly "aims to transform the nature of learning assessments from one that is summative and primarily tests to temenorisation skills to one that is. More regular and formative, more competency-based, and one that tests higher-order skills, such as analysis, critical thinking, and conceptual clarity." Critics must note that it is already a part of the agenda of the Ministry of Education.

The Parliamentary Standing Committee on Education, Women, Children, Youth and Sports, in its 336th report in 2021 had also taken note of some key challenges in the conduct of public examinations. It stated that "even after several decades, many State Universities regularly fail smooth and flawless conduct of examinations. Instances like question paper, confusion about seating arrangements and examination centre, rampant cases of copying, framing question sthat are out of syllabi, wrong examiners being appointed for assessment and student-exam-

The Question Bank system provides a solution to several issues. When a question bank providing a category-wise pool of questions is provided to the students at the beginning of an academic year, the element of secrecy vanishes Professional wrongdoers out to leak a question paper also lose their 'business'. With likely questions already open in the public, all that is left to the agencies conducting examinations is a draw of specific serial numbers of questions to be made a part of the question paper, limited to a specific

a question paper also lose their "business". With likely questions already in the public all that is left to the agencies conducting examinations is a draw of specific serial numbers of questions to be made a part of the question paper, limited to a specific examination centre. Rules should provide for total rejection of the answer sheet when an examinee attempts questions not earnarked for his respective examination centre. When public examinations are conducted through this Cuestions. amination centre. When public examinations are conducted through this Question Bank system, issues like question paper leak, framing of out-of-syllabus questions or administering a wrong question paper, etc, can be eliminated and foul-play or cheating tendencies nipped in the bud. The Question Bank system potentially pro-

The Question Bank system potentially provides a one-stop solution to many challenges. It crush the tendency of preparing for specific questions, ignoring the need to grasp a subject holistically. Also, with the question bank already made public, no teacher can enjoy the liberty of not covering portions of the Syllabus. If one chooses to have questions with different hornological number/s for every other student; the question of copying and related unfair practices may not arise at all.

The larger question is of the woefully in-dequate supply of human resources to provide leadership to our educational institutions not just universities but also colleges and schools. It is high time we deliberate upon the divisability of evolving an independent cadre, an Indian Education Service. This may help sprovide fillip to institution-building in the present-day context. It is time to recognise the urgency and importance of evolving indeprovider unipro missinction-busining in the present-day context. It is time to recognise the university of the present content of the present content of the present of the

Valley Under Curfew

FOLLOWING THE DRAMA which led to the dismissal of Parooq Abdullah's ministry, there seems to prevail an uneasy calm in the seams to prevail an uneasy calm in the scannin's Valley, fine foundation of the towns in the Valley. The capital is under the watchful eyes of the CRPF, the Border Security Force and men from the MP Armed Police. The army is being kept on alert for any summons from authorities.

J&K's New Deputy CM IN THE NEW 15-member ministry headed by G M Shah in Jammu and Kashmir, D D

Thakur has been appointed the Deputy Chief Minister: Thakur, who had previously headed departments of finance and law in Sheikh Abdullah's Cabinet, will be in charge of fi-nance, planning and development, besides power development and labour.

AKAL TAKHT DAMAGE

THE ARMY MAY be withdrawn from Harmandir Sahibi ft rension due to its presence in the Golden Temple complex materialises. Government is keen to commence repair work in the Akal Takht and other damaged portions during the Army action. Arrangements for "kar seva" are demanded

by some from the Sikh community. However a start could not be made as a demand was put forth for the withdrawal of the Army be-fore the seva started.

FLOODS RAGE ON

FLOODS IN MAHARASHTRA continued unabated while the situation improved in West Bengal. The death toll in Maharashtra rose to Bengal. The death foll in Maharashtra rose to six in the last two days while the rain-fed rivers, especially in the Konkan region contin-ued to be in spate. Official sources in Bornbay said the Shashtri, Vashishti, and Jagbudi rivers in the Konkan region and Doodhganga river in the Kolhapur district were overflowing.

WHAT THE OTHERS SAY

"The New Popular Front's program should be considered a pragmatic, socially democratic set of proposals aimed at reducing inequalities and preparing for the future. There is nothing radical in this agenda."

—THE GUARDIAN

A switch in the House

Two contrasting speeches in the 18th Lok Sabha, by the Leader of Opposition and the Prime Minister, show that myths have no monopolists

Sanjay Srivastava

THE KISHKINDHA KAND section of the Ramayana narrates the story of Ram slaying the formidable monkey king Vali, son of Indra and elder brother to Sugrav. All had pursued an asura into a cave, commanding Sugria vo until at its mouth. After al ongs period of waiting, as blood flows out of the cave, Sugriva assumes that his brother has been killed. He returns to the kingdom of Kishkindha and is crowned king. If was Vali, however, who had killed the asura and on his return to kishkindha, accused the sugrava and single the sugrava and valid the asura and on his return to kishkindha, accused Sugriva of bertayal and usurpation. Sugriva is driven away and supported to many indignities at Vall's hands. Sugriva and Kam longs at inendship and the Sugriva and Ram longs at inendship and the Sugriva challenges his brother to a battle, and Vali would then meet his end at his hands. A battle ensues, Sugriva is easily bested by Vali but no arrow (leaves Ram's bow.

Sugriva is puzzled. Ram explains that he was unable to fire his arrow, as both Sugriva and Vali look alike and he was afraid of killing when the sum of the sugravity and valid look alike and he was afraid of killing he wrong person, Ram asks Latshman to make agarhand of the guipushipi creeper and put it around Sugriva's neck, to distinguish him from his brother. Sugriva once again challenges Vali who, naturally, accepts. This time the arrow from Ram's bow finds its target—price put and the sum of the sugression of the sugravity and valid the sugression of the sugravity and valid the sum of the sugravity and the sugravity and valid the sum of the sum o THE KISHKINDHA KAND section of the

Minister, are instructive in what they tell us about the peculiar nature of political symbolism after what can be considered a setback for the ruling party in the recent elections.

Let us start with Rahul Gandh'is manner of naming fear to – after his own fashion – counter i. In what must be considered an extraordinary departure from convention and tradition for a leader of the Congress, Rahul candh'is Vegarture; when they can be considered an extraordinary departure from convention and tradition for a leader of the Congress, Rahul use of an approximation which is the many control of the consideration which is the many can be context for the re-assistance of the congress of the imaginary as the context for the re-fashion-ing of an opposition woke. He marshalled a variety of religious figures — Guru Nanak, josus Christ, Shiwa — oh is cause. The visage of the Lord of Dance made multiple appearances — albeit interrupted by human forces — in the parliamentary building. However, as Candhi repeatedly flourished an image of the "destroyer" of the Hindu trinity, human limbs that may have been directed to alter camera angles could not erase the meanings that were sought to be conveyed.

The Prime Minister responded the next day. The beatificts smile sported by the Speaker

The Prime Minister responded the next day. The batfic smile sported by the Speaker of the House could not, however, disguise the uncharacteristically this wordly tyesponse by Narendra Modi. Quite in contrast to Gandhi, the opening lines of Modi's speech referred to Indian history and the Indian people. This, from a political strategy has been the invocation of myths, including how "ancient" values and achievements continue to guide and make

contemporary India a unique society. Rather than casting his arguments in the language of a direct connection with divinity, the PM presented comparisons and metaphors from everyday life. The Congress, he noted, is like he small child who has been injuried in a bi-cycle accident and is being mollified that it's or such a terrible tragedy. The Congress deploys a mythical mode and the BJP, a factual one to make sense of their respective post-election advantages. And the Speaker smiled away, whether in comprehension or bemusement, is not clean. Perhaps he had some sense of the epic.—Ramayanic—propriors of the drama unfolding before him.

Let us now turn to another aspect of the two speeches. An important way in which Ganhis lought to make what might otherwise have been an entirely abstract idea — Fear—into a concrete emotion was through excerpts.

into a concrete emotion was through excerpts from conversations with those, he said, he had from conversations with those, he said, he had not not different ocasions. There was the woman who spoke of being beaten by her husband as she was unable to prepare a decent enough meal because of inflation; the family of the Agniver who feared destitution because their son had lost his file and little or no compensation might be forthcoming, and tittle or no compensation might be forthcoming, articulated by young women and men who had suffered in the recent NEET flasco, Derhaps, most provocatively, he spoke of the fear within the BJP where dissent he said, is severely junished.

rear within the BJP where dissert he said, is severely punished.

The PM responded — with an unprece-dented chorus of the Opposition's sloganeer-ing in the background, including exhorting the PM to "have shame" — by quoting "facts and figures". It was notable that Modi did not di-

The Prime Minister responded the next day. The beatific smile sported by the Speaker of the House could not, however, disguise the uncharacteristically this-worldly response by Narendra Modi. Quite in contrast to Gandhi, the opening lines of Modi's speech referred to Indian history and the Indian people. This, from a political leader whose key electoral and political strategy has been the nvocation of myths. including how 'ancient' values and achievements continue to guide and make contemporary India a unique society. Rather than cast his arguments in the language of a direct connection with divinity, the PM presented comparisons and metaphors

rectly refute Gandhi's invocation of fear as the dominant motif of BJP governance. He spoke of the Supreme Court's warnings against the threats to nationhood – the Opposition's slog aneering nowecheed with "we want justice" – and the "warning" he was now offering to the Congress to not obstruct the country's path the Congress to not obstruct the country's path to progress and development. The Opposition's 'anti-national conspiracies' that bappening in the country, he declared, would be unequivocally countered. A politician whose political mastery lies in presenting critary in the country, he declared, would be unequivocally countered. A politician whose political mastery lies in presenting critary in possibilities that may otherwise remain at the level of abstraction—fear, anxiety, unease, but the level of abstraction—fear, anxiety, unease, and the congress key representative—who has unsuccessfully relied on "facts and figures" as a political strategy—now has recourse to as a political strategy — now has recourse to the potency of mythological ideas.

the potency of mythological ideas. We are now in a moment where the mythical narratives — of ancient glories and moral superiority — through which the dominant party had cast the efficacy and truth-value of its governance strategy have become ragged. There is the exhaustion of repetition, with repetition depleting the original power of the narrative. Simultaneously, the Leader of the Opposition has discovered that must be have no monocoliers and their new of the Opposition has discovered that myths have no monopolists, and their po-tency lies in developing the appropriate languages of invocation. Perhaps, the Speaker was expressing some mixture of bemusement and concern at the turn of events.

Nine internal security challenges

Because a country projects its strength at the international level in direct proportion to its internal cohesion

PRAKASH SINGH

THE DUST OF elections has settled. The NDA government is firmly in the saddle. The Prime Minister has a formidable list of achievements to his credit. At the interna-

achievements to his credit. At the internaachievements to his credit. At the international level, India has prestage, which it probably has never had since independence. Our
conomy is on an upswing. China has, for
the first time, realised that it can no longthe control of the property of the first time, realised that it can no longbully India and beyond a point. India would
not shrink from a bloody confrontation.
The government should have a well-orchestrated plan for the next five years. On
the great part of the property of the property
networks and the property of the property
had with the property of the property
had the property of the property
had corrine. (NSD). The National Security
Advisory Board has, from time to time,
worked on it and prepared drafts. Those
were never approved. All significant powres have an NSD through which they describe the internal and resternal challenges
can be supported to the property of the property
had the property
had the property of the property
had the

Four, the Notheast in Perhit e withstee has called the Northeast 'a piece of our heart'. The beating of the heart is unfortunately not healthy. A Framework Agreement signed with the rebel Nagard 2015 had raised great hopes, but these remain unfuffilled because of the NSCV(Missistence on a separate flag and constitution. The government should meanwhile insist on rigorous implementation of the suspension of operations agreement almost on the suspension of operations agreement and resize that the rebels do not engage in extortion and fortible recruitments. Maintenance of the suspension of operations agreement and so the suspension of operations agreement and so the suspension of operations agreement and so the suspension of operations and fortible recruitments. Maintenance of the suspension of operations are the suspension of operations and outbursts' formation of a multi-ethnic peace committee on the problems of filegal migration, drug trafficking and arms smuggling would require a

comprehensive approach.
Five, the Naxal problem. The Minister of State for Home Affairs, Nityanand Rai, in a statement made in the Rajya Saha on February 7, claimed that the implementation of the "national policy and action plan" had resulted in a consistent decline in violence and shrinkage of the geographical spread of left-wing extremism's (LWE) in-thence. Violence and the resultant deaths had declined by 73 per cent from a high in 2010. Rai further stated that the number of police stations reporting LWE-related violence had come down from 465 police stations across 46 sistricts in 2010. 717 police stations across 42 districts in 2023. So far, so good With Naxalson the backfoot, it is now d. With Naxals on the backfoot, it is nov

stations across 42 districts in 2023. So fair, so good. With Naxalon the backfoot, it is now time for the healing touch. The government should offer them the olive branch, declare a unilateral ceasefire for a month, persuade them to come to the negotiating table, address their genuine grievances, and bring them into the mainstream.

Six, Intelligence Bureau, IGB. It he mainstream.

Six, Intelligence Bureau, IGB. It he meanist the intelligence Bureau and the CBI, require restructuring. The Bwas set up through an administrative order on December 23, 1887. It is high time that it is given a statutory basis, with safeguards to prevent the misuse of intelligence to bloster the party in power. The CBI was set up through a resolution passed on Apil Food Suptin 1963, and tid derives the power to investigate from the Delhi Special of the property in the property of the property in the programmend of the 24th report of the parliamentary committee. "the need of the hour is strengthen the CBI in terms of legal mandate infrastructure and resources."

strengthen the CBI in terms of legal made, infrastructure and resources."
Seven, state police. The Prime Minister wants the PMO to function as the People's PMO. Indeed, it should! But of greater value and more relevance would be the transformation of the "Ruler's Police" that we have inherited from the British into the "People's Police". Robert Peel, former British prime minister, is remembered to this day for having reformed the country's police. It is a great opportunity and also a challenge for our Prime Minister.

Eight, Central Armed Police Forces. The

ingretomed the country's police. It is a great of poportunity and also a challenge for our Prime Minister.

Bight, Central Armed Police Forces. The CAPFs with an overall strength of more that a million are best with serious internal problems of unplanned expansion, hapbar and deployment, inadequate training, falling standards of discipline, vague-retieral for the selection of top officers, friction for the selection of top officers, friction between cadre and All India Service officers, etc. The overall mining falling standards of discipline, vague-retieral for experiments of the provented to appoint a high-powered commission to go into these problems for their long-term solution.

Nine, technology, There is neomous scope for technological inputs into the functioning of police in the country. These inputs would act as force multipliers. As suggested by the PM at the DCPs' conference held in Lucknow in 2021, there is a need to set up a high-powered technology mission to recommend the adoption of the latest tech for the new challenges which the police are fairing or are likely to face in the future.

A country projects to face in the future, in a country project to face in the future.

A country projects to face in the future, in a country project to face in the future in internal cohesion, its ability to resolve differences within and not have any swamps where terrorists or extremists can breed. The internal security scenario of the country would be better if action on the above lines is initiated with foresight and mining intain.

Karnataka bill provides framework to bring gig work into regulatory ambit of labour

Yameena Zaidi and Anupam Guha

ON JUNE 29 the government of Karnataka released the Karnataka Platform Based Gig Workers (Social Security and Welfare) Bill. 2024 inwiting public suggestions. If passed, this would make Karnataka the second Indian state, after Rajasthan, with legislation for gig workers. This draft bill has the potential to extend to gig workers key rights that the Rajasthan Platform—Based Gig Workers (Furthers) and Workers (Furthers) and Welfare Act. Workers (registration and Welfare) Act

2023 failed to provide. One criticism of the Rajasthan law is that One criticism of the Rajasthan law is that it does not acknowledge the expanding view of various legal and economic scholars like Evgeny Morozov, Moritz Altenried, and Julia Tomassett who argue that platforms are not intermedianted or markets but employers. This view is gaining traction in international legal cases with courts in the Netherlands acknowledging that the drivers and platform have a 'modern employer-employee relationship' while courts in the UK and Spain consider associates "workers" but have not stated that the employer is the platform. The Rajasthan law does neither, it does not consider the platforms the platform.

form worker an employee or the platform the employer, but declares a separate category called "sig work", which it does not define in how it differs from extant work. The Karnataka bill while continuing to refer to platform companies as "intermediaries" does provide a clearer definition of gig-workers and creates mechanisms for a formal contract between platform companies. mal contract between platform companies and workers. Details of what this contract

and workers. Details of what this contract will look like remain unanswered. This potentially provides an enabling framework to bring platform-based gig work into the regulatory ambit of labour.

One concrete issue plaquing gig workers is that their employers, the platform companies, arbitarily and often terminate their access to the platform, in effect, terminating their jobs. Since these companies refuse to acknowledge they are employers, this is framed as blocking access to a service. The Karnataka bill draft refutes this framing by mandating that companies profree. The Nathataka of Hutart retures this framing by mandating that companies pro-vide notice of termination, with a valid rea-son, 14 days in advance. While it states that grounds for termination will be provided to workers at the time of contract signing, at

this stage it is difficult to ascertain to what extent the legislation will be able to prevent unfair terminations. In effect, the draft affirms that what the platforms provide is not a mere service which can be arbitrarily withdrawn. Unlike the Rajasthan legislation, where algorithmic transparency can be sought only but the state and the welfare board, the Karnataka bill draft empowers invenders to informs. gig workers to request access to informa tion about vork, ratings and personal data. Currently, give owicers have an opaque relationship with the platforms, which monitor the actions of the workers, punishing those who do not "perform", but most platforms do not even divulge what these metrics are. This provision reduces the potential for algorithmic wage discrimination, workplace harassment, etc.

The bill also expands the role of the welfare board beyond overseeing the disbursement of social security, to include consultation with gig-worker associations and empowers the board to make social security schemes for women and people with disabilities. Thus, the draft accepts the socialised nature of platform-based gig work tion about work, ratings and personal data

instead of an atomised transaction beinstead of an atomised transaction be-tween a service provider and an "associ-ate". It creates a grievance redressal mech-anism for giv workers; however, they can only be raised about provisions of the draft lill. It however mandates that gig-workers be compensated on at least a weekly basis. Notably, the draft bill states that gig work-ers have the right to raise disputes through the Industrial Disputes Act, 1947 and the the Industrial Disputes Act. 1947 and there-fore in an indirect, however significant, manner empowers them to make use of existing Indian labour laws and potentially brings gig workers out of regulatory lacuna. These developments indicate that even if indirectly, the draft bill brings collective bargaining for gig workers back on the agenda and reflects the impact of the grow-ing strength of gig worker unions in India. For platform-based gig workers, this is a promising development, though the recog-nition of gig work as employment tremains nition of gig work as employment remains

A FALSE CLAIM

THIS REFERS TO the article, 'Attack on RSS is a self-goal' (IE, July 3). The article arguing that Rahul Gandhi's attack on Hindutva in his Parliament speech is a product of pseudo-secularism is unwarranted. Claims that the RSS is not realified a weaconvisionic fine affect here. warranted. Claims that the RSS is not political are unownienting since it's the BJP's parent organisation. However, no their political pare unorty has the RSS's reach. Its avowed objective of Hinduisation to the Mughale rate onable Hinduis to regain their cultural identity and illustrate them from a victim complex, raises a pertinent point about the need to reconcile caste inequalities. LR Murmu, New Delhi LR Murmu, New Delhi

JUSTICE CALLS

JUSTICE CALLS

THIS REFERS TO the editorial, Syndicate vs law (IE, July 2). The incidents of brutality reflect a stiffed approach in a civilised society. Law must take its course and administer justice. Time and again, we witness such horrendous clashes, yet there's no straight jacker formula to prevent it. We need a stronghold on the bureaucratic setup to maintain baw and nofer across the nation. tain law and order across the nation. Rajesh Raj, New Delhi

INDIA-UK TIES RESET

THIS REFERS TO the article, 'Delhi & a new London' (IE, July 3), Days before the UK vote, it sent important signals suggesting that it wants to reset relations with India. The Labour Party is likely to come to power. Its outreats hodes well for London-Delhi ties, Under the former leader, Jeremy Corbyn, the party criticised alleged human rights abuse in India, especially against minorities and in Kashmir. Meanwhile, India has been unhappy with the surge inpro-Rhalistan sentiments in the UK. How the Labour balances these factors could determine balances these factors could determine the future of India-UK relations. SS Paul, Nadia

OPPOSITION'S TASK OPPOSITION STASK
THIS REFERS TO the editorial. The first face-off (IE, June 3). A strong Opposition in a democracy facilitates effection legitimised a strong opposition. This should be utilised by both the Opposition and the utilised by both the Opposition and the utilised by both the Opposition and the utilise party to actively participate in debates rather than chasing personal seventials. Opposition parties should try to focus on issues of people's welfare. es of people's welfare. Haritha Rao, Hyderabad

OUR VIEW

Adani-Hindenburg saga: Side roles come to light?

Short-seller Kingdon and a Kotak set-up fund are in the arc-lights of this market drama. The general lesson, though, is that high-profile listed companies ought to be widely held

he list of dramatis personae in the drama that unfolded after Hindenburg's report of 24 January 2023 on the Adani Group has grown. Online searches for 'Kingdon Capital Management' and 'Kotak India Opportunities Fund Class F' surged this week on news of the American short-seller's reaction to a show-cause notice sent by the Securities and Exchange Board of India (Sebi). The market regulator had dubbed Hindenburg's report sensationalist, asking it to explain its allegedly unfair efforts to profit from a crash in Adani stocks that followed its allegations of fraud, stock manipulation and more, all of which were denied by Adani even as the market value of its listed firms shrank. Kingdon, a US-based hedge fund, was named by Sebi's notice as Hindenburg's sole investor. Its role? It began betting against Adani shares a fortnight before that report was published. In its public response, Hindenburg accepted Kingdon as an "investor Hindenburg accepted Kingdon as an "investor partner," but sought to highlight the role played by Kotak Mahindra Bank in setting up an offshore fund—a "Class F" spinoff of an existing fund—that was used by the hedge fund for acts of short-selling under Sebi's scanner. This has dragged yet another name into a story that has

kept market watchers agog for over 17 months.

Do these actors merit a spotlight in the long arc of the Adani-Hindenburg saga? To distance itself from controversy. Kotak has denied foreknowledge of Kingdon's link with Hindenburg and of the latter's report. The bank said it did not know that the US hedge fund would act on the basis of price-sensitive information, given that it had confirmed it would operate solely by what was publicly known. Kotak's Class F unit was a shell company registered in March 2022

and bought by Kingdon in December that year. According to Sebi's timeline, the US hedge fund According to soor's timeling in Cost ineger than purchased it about a month after getting a draft of the Hindenburg report that would batter Adami stocks. Since Sebi was probing a market bout of short-selling, it had good reason to focus on the actual sellers—or direct profit makers— more than their investment vehicles. Unless evidence emerges of Kotak collusion with Kingdon, it is the latter's association with events that's far more likely to endure.

The story isn't over. Sebi was asked last year by the Supreme Court to investigate not just proximate causes of the volatility in Adani stocks (which have largely recovered since), but also to probe the Adani Group in the context of Hindenburg's allegations. This January, the court said that most aspects of Adani's conduct had been looked into by Sebi and its investiga-tion "inspired confidence," but two parts were pending, as Sebi awaited inputs from foreign regulators to conclude the process. While we await this conclusion, a larger lesson from the episode can still be drawn. Recall that Adani stocks saw steep drops even before Hindenburg took centre-stage, with those investor jitters attributed to the companies' allegedly unclear compliance with Sebi's 25% free-float rule, seen as exposing them to distortive swings in market value. In general, markets for such assets work best when they have sufficient depth of trading, with a sizeable volume of stocks being bought and sold daily at prices determined by a wide interaction of demand and supply. The more widely a firm's equity is held, the better its share rice captures its true value, thanks to a broader lend of views. It would serve everyone well if all high-profile listed companies took note. It would make stock-rigging charges hard to level. MY VIEW | OTHER SPHERE

Residents of ultra-slums should have access to welfare provisions

Food, water, health and education are basic needs that nobody living in India should be deprived of

he open sewer runs straight for 10 kilometres. In a gorge about 8 metres deep and 50 metres wide, with sides sloping such that 20 metres of its width in the middle is flat. The 6-metre-wide sewer is in the middle of this flat stretch. An elevated highway runs over this gorge for its entire length of 10 kilometres, about 20 metres above the land on the banks of the gorge. A busy railway line runs parallel to the southern bank for most of the stretch, and a road on the northern bank. The highway above covers the entire width of the gorge. From the high-speed six-lane highway, the gorge with the sewer in the middle is not visible because it is right underreach.

me induce is not vision eceases in right underneath.

Swirling dark muck flows fast in the sewer. It is the worst of the waste from a city of over 2 million people. The stends is thick and settled. Over 2,000 families live on the slopes of the gorge. In shanties made of discarded plastic, metal sheets and rotting wood. The sewer overflows during monsoon rains, so the shanties are only up to half the disnance down the naked slopes, with no obstruction to the eye, stark from both banks of the gorge. At intervals along the sewer, frayed saris can be seen wrapped around four bamboo sticks wrapped around four bamboo sticks dug in the ground to form a two-by-tw square foot toilet.

Outside the gorge, even those who

live nearby believe that the shanties house hooch-makers, drug-peddlers and other petty criminals. But if you do not judge from the high banks and brave a descent into the gorge, you will meet the typical poverty-striken Indian. A labourer, traffic signal-vendor or a beggar, doing what it takes to survive. There must be a few criminals amid them, but unlikely to be any more than in the swanky high-rises that are visible from parts of that gorge. Why do these families live there? Because nobody chases them away. Not the police, not land sharks, not even the good Samarrians who want to keep the cyti clean. The sewer is their samctuary. Anywhere else in the city—under a flyover, on footpaths, beside a railway line, or anywhere else—someone or the other hounds them because land is gold

or anywhere eise—someone or the other hounds them because land is gold in the city. But why live there at all?

Because back in their villages, they can't even eke out that one meal that fends off

even eke out that one meal that fends off starvation. Majestic is the expanse of our holiest river. It is visible from that elevated highway. Its waters are not like the sewer's, but the devout likely trade sin for disease when they wash in it. The water is clean, but its banks are not—not even a thousand kilometres upstream at one of the country's sacred pilgrimage centres. From another gleaming high-way, we can see muck-laden banks with familiar plastic-metal-wood shanties. way, we can see muck-laden banks with familiar plastic-metal-wood shantics. Poverty chasel-wood shantics of these out of their villages, but no one chase them off these mucky banks, so long as they voluntarily vacate every time a media or fair is held, major or minor. A piety-fuelled construction boom in the vicinity gives them some daily-wage work. Or at least they have the safety net of alms from the everyday thousands who come to take a dip in the holy trive. Children don't go to school, neither from the sewer zone, nor from the mucky banks. They are not given admission, and if they are, if's too dangerous to cross the busy railway line or

cards—which means they have no access to the public distribution system of grains. Most have no documents to access India 's public health schemes. Water to drink is a daily struggle and acquiring it takes away their earnings or work-hours or both. Temples are out of bounds. Births are fraught, with no access to the public health system, and mytate delivery unimaginably beyond

bounds. Births are fraught, with no access to the public health system, and private delivery unimaginably beyond reach. Death demands funereal dignity, often resulting in a slide deeper into poverty for family members left alive. Two thousand kilometres south of this place of pligrimage, from another spanking highway hugging another drain of urban waste, one can see a series of the same plastic-metal-wood shanties, It's just another mid-sized city, where the precarity of livelihood is less (fonly infinitesimally so) than in their villages, yet sufficient to offer them the hope of a higher chance of survival. Which is the case across all our cities, and why these shanties are everywhere. What was once a phenomenon of our large cities has spread to most small and mid-sized urban centres. But these are not slums. Perhaps ultra-shuns, much further down the precipiee of life. If we don't create enough decent jobs and livelihood opportunities, and ensure they're distributed evenly across India, the core problem will not be addressed.

livelihood opportunities, and ensure they're distributed evenly across India, the core problem will not be addressed. It doesn't appear that we know how to do that, not only as a nation but even globally. Acknowledging that we don't know may be a start for the kind of deep efforts that are required on every dimension—from research and policy to action on the ground and business. But this doesn't mean that in the meanwhile we don't do the most basic of things for the poorest of our people. If we can have high-speed highways for our cars, why should they not have food, water, basic health and education? We have welfare systems for most of these, but residents of ultra-slums have almost no access to them. We must change that. Sewers need not be sanctuaries for fellow citizens.

Parliamentary debates form the essence of democracy

SANJEEV KHOKHAR

he just-concluded general elections have once again proven the vitality of Indian democracy. The democratic process has established that the democratic institutions of this country are more than capable of giving all sections of society a voice, especially the magnitude of the democratic institutions of this country are more than to processes have kicked in. With that, the formal process of political communication between electors and the elected has also begun. Parliamentary debates are an important element of this. Elected representatives of the people make their position on various issues official by engaging in debates on the floor of the two Houses of Parliament.

There is no denying the fact that in this

Iloor of the two Houses of Parliament. There is no denying the fact that in this day-and-age of electronic media, both conventional and social, there is no dearth of instruments available for political messaging. This has led some political commentators to question the relevance of parliamentary debates. They contend that these often repeat what has already been said in the

public sphere by political campaigners, party spokespersons and Members of Parliaparty spokespersons and Members or rarm-ment (MPs), and there is nothing new that these debates offer in terms of either politi-cal positions or information. They also ques-tion the 'deliberative effect' of such debates.

cal positions or minorimann. They also updates, since instances of a climbdown or revision of a previously-held position by an opponent in the light of what German political thinker Durgen Habermas called "the better argument" are few and far between. This might be true to an extent, as parliamentary debates are no paragons of Habermasian virtue—which aims for an 'Ideal Speech Situation,' where participants are swayed by reason and reason alone. Politics being 'essentially contested,' such a situation is neither feasible nor desirable. But what such opinions ignore is the unique ability of parliamentary debates not only to provide a mulli-perspective view on political issues, but also impart authenticity to the positions taken by national political players positions taken by national political players by making them official. This kind of validity by making them of trical. Inis kind of validity is not available to expressions and assertions of a political stance in other mediums such as the news media. Positions taken in Parliament are what act as a record for the electorate to assess the conduct of political representatives. In the absence of such clarity, it

almost entirely strategic

almost entirely strategic
and thus partisan in
nature, and that their real aim is to influence
the electorate outside the House rather than
help make better legislative decisions within
Parliament, which is anyway done by voting
on motions. In other words, numbers rather
than arguments determine enactments.
This view, though largely true in its observa-

would be difficult for the electorate to evaluate their work and vote accordingly. Statements and assertions made elsewhere, though important, do not serve as concrete indicators to help a voter reward or punish a representative. Moreover, political statements and assertions made by political players elsewhere run the risk of being lost amid vast waves of media messages. As for the other purpose of parliamentary debates, critics are not entirely off the mark when they say that these discussions are not deliberative, as they neither influence opponents to revise their positions, nor help in reaching a consensus. Critica argue that such debates are almost entirely strategic

response to this, it can be

response to this, it can be said that important debates that matter more are widely shown on air by various news channels and also widely reported. The sharp political positions taken in these debates are also disseminated to voters at large through press conferences and political speeches. In short, what is important in these debates for the electorate

somehow reaches it, directly or indirectly, helping voters decide their preferences.

Just as Parliament is the most visible symbol of our democracy, parliamentary debates are the most obvious examples of 'democracy in action.' In the words of James democracy in action. In the words of James
De Mille, "A parliamentary debate, when
carried on by able men, is one of the finest
exhibitions of the powers of the human
mind that can be witnessed." Thinkers like
Habermas observe that a communicative
society is much better placed to resolve its
conflicts than a non-communicative one, as
the former provides institutional structures
for flagging issues and raising concerns as
well as discussing and resolving them.
Houses of Parliament are core sites of
deliberation where national issues can be
discussed and solutions found through
argument. To paraphrase Robert E. Goodin,
talking is a good 'discovery procedure,'
while voting is a good 'discision procedure,'
while voting is a good 'discision procedure,'
while voting is a good 'discision procedure,'
while work in the control of the procedure,'
while work is a good 'discovery procedure,'
while work is a good 'discovery procedure,'
while work is a good 'discision procedure,'
while wor

while voting is a good 'decision procedure,'
and talking before voting is always good for
democracy. What makes Parliament unique
is its special ability to combine elements of
aggregation and deliberation that can confer
higher political legitimacy on participants.
For all these reasons, we must give parliamentary debates their due and remain hopeful that we will have plenty of them.

MY VIEW | UNCOMMON SENSE

Get your meetings right: Time is too valuable a business resource

A goal-oriented and value-maximizing approach to meetings can help leaders boost the productivity of their organizations

Marico, and the chair of practices at Boston Consulting Group India.

ime is the most scarce resource for any leader, influencing not only her indi-vidual performance but also the orgal'ieader, intiuencing not ony her individual performance but also the organization s' culture and strategic direction. Leaders, therefore, must be
strategic in how they spend their
time—with themselves, and non-en-on-one as well
as group meetings. Time alone allows leaders to
both respond and react, but more importantly,
step back, reflect and strategize. Some CEOs, for
instance, block off parts of their day to focus on
these solo tasks, recognizing the importance of
uninterrupted time for high-levelt thinking.
Meetings are a significant component of a
leader's time expenditure. One Harvard study
showed that CEOs spent 72% of their total work
time in meetings, while another MIT Sloan article
concluded that the average executive spends about
5% of his or her time in meetings. At the same

time in meetings, while another MIT Sloan article concluded that the average executive spends about 50% of his or her time in meetings. At the same time, whether it is in the sitcom The Office or Dilbert cartoons, or in our conversations, there is a clear view that many group meetings are run poorly. This article focuses on what could help improve the effectiveness of meetings. Meetings are essential for decision-making, aligning a team and fostering collaboration. However, to be effective, group meetings need to be well-structured. This includes having a clear agenda, defined objectives and ensuring the right people are in attendance. Avoiding unnecessary presentations and focusing on dialogue and decision-making can make them productive. But even before getting to 'how best to run a meeting,' we think it is important to answer two key questions.

The first is whether there should be a meeting at all, or can the objective be met through an empowered midvidual (with inputs from others) or even in a group setting via email? This is even more relevant for recurring meetings, which start off with the right intention but then inertia takes over.

The second is clarity on the desired objective of the meeting—is it to generate ideas, challenge solutions. Take decisions seek alienment or com-

the meeting—is it to generate ideas, challenge solutions, take decisions, seek alignment or com-municate with a broader group? Meetings can be set for any of these, but there needs to be clarity on

set for any of these, but there needs to be clarity or what outcome is expected.

It is crucial to implement structured processes to increase meeting effectiveness. Based on our experience across organizations, there are seven practical principles that can help leaders run meetings more effectively.

Define the agend sharply: This is easier said than done but the most important step nonetheless. Clearly outline the meeting shoptcives. Distribute necessary material in advance to allow every participant to come prepared. This can save time and lead to more meaningful contributions and outcomes.

Deliberate participation: Invite only those who can contribute value or benefit from the discussion. This helps keep the meeting focused and prevents if from becoming unwieldy. Tesla's chief Elon Musk has gone one step further; he suggests that those who feel they are not contributing enough should leave the meeting.

Avoid PowerPoint presentations: Use the meeting

time for discussion and decision-making, rather than lengthy presentations. This approach keeps participants engaged and the conversation dynamic. In a previous article, we talked about the

dynamic. In a previous article, we talked about the famous Amazon memo that everyone reads at the start of a meeting—rather than sit through a presentation—for discussions to be held on it. Insist on punctuality: Start meetings on time to respect everyone's schedule. Tuming up late for meetings (regularly) indicates either lack of control and/or discrepcet for others' time, neither of which is a trait one would look for in a leader. We know of some organizations that implement penalties on latecomers, if necessary, to discourage tardiness. But, ultimately, it is the leader (or the one chairing

the meeting) who must lead by example.

Encourage balanced participation: Ensure that all voices are heard and not just the dominant ones. The chairperson should facilitate a wide discus-

sion, giving quieter members an opportunity to speak. In her book Quiet The Power of Introverts in a World That Can't Stop Talking, Susan Cain makes a powerful case for listening to introverts. Summarze key points: At the end of the meeting, recap the main points and decisions. This ensures clarity and alignment on the next steps. While well begun may be half done, true value is realized only when there is action and follow-through. Actionable minutes: Record minutes of the meeting in a format that clearly states: who "will do meeting in a format that clearly states: who "will do

Actionable minutes: Record minutes of the meeting in a format that clearly states 'who' will do 'what' and by 'when' (the WWW format). Circulate these minutes within two days of the meeting to maintain momentum and accountability in the group. For a recurring meeting, start by reviewing the previous meeting's action items, as this helps ensure that previous decisions are acted upon. Implementing all these practices can transform meetings from time sinks into valuable sessions that drive decisions and align strategies. As leaders strive to manage their most precious resource, time, running meetings effectively becomes a critical skill. By adopting a disciplined approach to time management in pursuit of organical control of the contr

approach to time management in pursuit of orga-nizational goals, leaders can enhance their own productivity as well as the overall performance of their organizations.

MINT CURATOR

Citigroup's climate sensitivity made it a target for protestors

Companies that make progress tend to attract even more protests

is a Bloomberg Opinion columnist

the financial sector. The bank is far from it the financial sector. The bank is far from it. Citi is the sixth-largest provider of loans to oil, gas and coal since the 2015 Paris agreement, according to analysis by Bloomberg News, and its fossil fuel lending has steadily declined in recent years; so far in 2024, it's the 12th biggest provider of loans to the fossil fuel sector.

decime in recent years, so lar in 20.47 to the 12th biggest provider of loans to the fossil fuel sector.

Chi's progress is likely what in part made it a target. It has shown that it cares about its sustainability reputation and the activist group is capitalizing on that. Protesters have said as much, noting on their website that they are going after Citi because "we know we can push them to do the right thing." On her first day as Citi CEO in 2021, Jane Fraser said the company would reach net-zero greenhouse-gas emissions in its financing activities by 2050, and has committed \$1 trillion for financing sustainability efforts by 2030.

Researchers call it the "target enhancing effect". Companies investing in climate action or other social initiatives are attractive targets for activists. Charlotte Moore, managing director at Sigwatch, which tracks and collects data on activism directed at corporations, told me people are always surprised to learn that the most targeted energy company is not Exxon Mobil or Saud Aramo. Rather is usually a European firm like Shell or TotalEnerjes, because they are willing to change or be seen as changing. "The idea is that if you be a consumed to the company in the space to move on something, it changes the industry expectations and consumer expectations and coveryone else has to fall in line," she says. There are limits to how effective this kind of pressure can be. Researchers have found that the best-performing companies

kind of pressure can be. Researchers have found that the best-performing companies from an environmental standpoint have very little incentive to do more because it only further raises this threat of environ-mental activism. And in general, Moore

told me applying public pressure "makes

told me applying public pressure "makes companies more reluctant to put the heads above the parapet." She adds: "If the move you make is seen as not good enough or genuine enough, then you do open yourself up to targeting and criticism." ESQ politics has only gotten more complex. Not only are firms being attacked by activists on the left, they also face a backlash from the political right. Citi, for example, is among a group of banks that has been punished by Republican states for its "boycotting" of the fossis filed industry officering and the properties of the properties of the results of the properties of the results of the properties of the control of the properties of the properties

These dynamics have shifted the peer effect that activists hope to exploit—the idea that top managers are more likely to take action if they see a competitor being targeted by activists. Instead, companies have become even less eager to lead on these issues. CFOs are saying and doing even less on ESG and DEI out of fear that they will become a target of the anti-woke mob. The Walt Disney Com-pany, for example, become a favourite pany, for example, became a favourite punching bag for Florida Governor Ron

punching bag for Florida Governor Ron
DeSantis over its opposition to the state's
Don't Say Gay Bill. Or take Target and
Anheuser-Busch, which faced boycotts
from conservative consumers for their
LGBTQIA+ solidarity.
Over at Citi, it's turning into the 'Summer of Heat' in more ways than one. Activists are attacking the bank at a delicate
moment for its CEO: "The clock is ticking
on Jane Fraser's Citigroup Turnaround,"
read a Wall Street Journal headline, with
the nices notine that its profitability and the piece noting that its profitability and stock performance are lagging behind its US rivals. The protests are giving Fraser a headache, which climate activists would argue is the whole point — disrupting busi-ness as usual to force companies to face

ness as usual to lorce companies to face such an urgent cause.

But in doing so, they risk making one of their allies even more vulnerable. The Summer-of-Heat crew should let things cool off at Citi and go light a match under a truly bad actor. Or better yet, consider truty bad actor. Or better yet, consider switching tactics: In this charged environ-ment, it may be more effective to work behind the scenes with companies that are ready to engage. As the 'greenhushing' trend has shown, there are firms that are open to improving their policies, but don't want to talk about it. @BLOOMBERG

THEIR VIEW

Class action lawsuits are unicorn-like: Worthy but rare

SRINATH SRIDHARAN & SAKATE KHAITAN

lass action suits in India are like uni-coms—legendary, promising and articons'representative actions existed in the statute book for over a century in the Code of Civil Procedure of 1908. Similar provisions have been incorporated in the Consumer Protection Act of 2019 and the Competition Act of 2002. Further, class action suits are often clothed as public interest litigation (PIL) under Articles 32 and 226 of the Con-stitution. However, none of these statutes specifically covered shareholders as a class. In a landmark move. India introduced lass action suits in India are like uni-

specifically covered shareholders as a class. In a landmark move, India introduced shareholder class action and derivative action lawsuits through Section 245 of the Companies Act of 2013. Surprisingly, for 11 years, this provision has remained largely theoretical, with only two cases—Jindal Poly Films and ICICI Securities Ltd—being filed

A class-action suit, or representative action, allows a large group of people with similar interests to collectively bring a claim to court. This collective group is known as a

'class.' Class action suits have immense potential to protect minority shareholders, depositors and investors from corporate wrongdoers. Fighting as a class enables them to secure better legal representation, ashare litigation costs and pool their knowl-edge and experiences to build a strong case. In a country where lawsuits are expensive and lengthy, minority stakeholders are often at a disadvantace against the formidable and lengthy, minority stakeholders are often at a disadvantage against the formidable legal and financial muscle of corporate houses. In such cases, a class action, backed by the strength of many, is likely to be taken seriously by businesses and courts. The biggest challenge remains the high cost and slow pace of linguistion, coupled with the apparent reluctance of Indian courts to award substantial damages and penalties. Over the past few years, the Indian stock market has witnessed a significant influx of retail investors. This surge is complemented by an increasing number of businesses get-trail gisted for their shares to be traded pub-

ting listed for their shares to be traded pub-licly. Shareholder activism, aimed at better nety. sharenoider activism, aimed at better corporate governance and involving the scrutiny of management actions, has been rising too. This usually happens when share-holders believe the company is being poorly run, potentially leading to financial losses or societal harm. Shareholders whose rights

enabling collective legal action against corporate misconduct. The existence of the provision, thus, promotes higher standards of transparency and accountability in corporate India.

While such lawsuits can help level the playing field, for them to be truly effective, the provisions for class action should include all categories of minority stakeholders affected by mismanagement. Two amendments have allowed class action to inch forward. A 2016 amendment of the Companies Act simplified procedures and eligibility criteria for filing class action suits. In May 2019, new thresholds for defining a 'class' under Section 245 were notified. An eligible class can now comprise 5% of members holding 5% of the issued capital in an unlisted company or 2% of the issued capital in a listed company.

the company is being managed in a way detrimental to their interests, may initiate a class action lawsuit. Such suits offer a vital remedy for breaches of minority-rights by tenabling collective legal action against corporate misconduct. The existence of the provision, the spread of the most perfective, the provision such as action should include all categories of minority raphs by mismanagement.

Collective legal action against carbier between the provision, the substance of the most perfective, the provisions for class action should include all categories of minority stakeholders affected by mismanagement.

Two amendments have allowed class action to inch forward. A 2016 a mendment of the Companies Act similarly, 5% of the total number of deposits, or 100 members, whichever is lower. Similarly, 5% of the total number of deposits, or 100 members, whichever is lower. The similarly, 5% of the total number of deposits, or 100 members, whichever is lower. The similarly, 5% of the total number of deposits, or 100 members, whichever is lower, within the similarly, 5% of the total number of deposits, or 100 members, whichever is lower, will all the similarly, 5% of the total number of deposits, or 100 members, whichever is lower, composite to the similarly, 5% of the total number of deposits, or 100 members, whichever is lower, composite to the class action to members, whichever is lower, composite to the composition of the composition of the companies of the composition of th

ted remuneration structure wyers, under which a contingent fee is

for lawyers, under which a contingent fee is not allowed. Further, to mitigate the risk of exploitation by an errant lawyer, all contingent arrangements should be disclosed and monitored by the Bar Council.

However, to strike a balance and disincentivize frivolous class actions, the judiciary

must also levy exemplary penalties on liti-gants in such instances and also on lawyers with contingent-fee deals. On the whole, the courts and government must adopt a more accommodative approach to class action lawsuits. Without approach to class action lawsuits. Without significant legal reform, true class action will remain limited to stray cases where some-one assumes leadership and financial

one assumes leadership and financial responsibility. Class action suits in India have the potential to democratize access to justice and hold powerful entities accountable. Yet, so far, class action suits have not been embraced with the enthissam they should be. For minority shareholders to achieve justice, especially, class action suits could offer a speedy legal process. Implementing fast-track judicial processes for class action suits would reinforce the faith of citizens in the concern as well as overful indicial system.

would reinforce the faith of citizens in the concept as well as overall judical system. The urgency of embracing class action suits in India cannot be overstated, particularly as the Indian economy expands further and integrates itself more deeply with the global economy. Effective class action mechanisms can significantly enhance corporate accountability, thereby boosting investor confidence and attracting more investments from overseas.

PAPER WITH PASSION

Innocent lives lost

Stampede at a satsang in Hathras kills at least 121, highlighting the urgent need for stronger regulations

n a tragic and devastating incident in the Hathras district of Uttar Pradesh, a stampede during a satsang resulted in the deaths of at least 121 people. Although the exact cause of the mishap will be determined after a detailed investigation, eyewitness accounts reveal that the stampede occurred when devotees surged forward to seek blessings from Narayan Sakar Vishwa Hari, also known as Bhole Baba. The devotees rushed to touch Bhole Baba's feet and attempted to gather soil from his path, a customary practice that led to the chaos. Many people fell into a nearby drain. Some evewitnesses reported that after the satsang concluded, many followers rushed toward Bhole Baba to touch his feet or catch a glimpse of him as he departed in his car. People wanted to get his darshan and collect soil from the road on which his car left the venue. As the satsang ended, people started leaving in groups. Due to the rain, many slipped, and others fell on top of them, lead-

ing to a crushing cascade. Others maintain that people started rushing out due to the humidity when the incident occurred, and many followers, most of whom were women, felt suffocated.

The incident exposes many disturbing facts, rang ing from the negligence of the administration to the unchecked influence of godmen over innocent peo ple. Bhole Baba is reportedly absconding. First of all, the number of attendees far exceeded the permitted limit. The chief sewadar (organizer) of Baba's program estimated an attendance of around 80,000 people, but the actual number was signif-

icantly higher. Indeed, this breach of the permitted capacity likely exacerbated the situation, leading to overcrowding in a venue that was inadequate. Now, after this horrific incident, the government is in damage control mode. Compensation for the deceased has been announced, and the Chief Minister is expected to visit Hathras. Additionally, a team has been set up to investigate the cause of the incident. However, in all probability nothing will change and that this incident will soon be forgotten like many before. As we mourn the loss of 121 lives and support the injured and their families, it is imperative to learn from this tragedy and implement effective measures to prevent such incidents in the future. We must prioritise safety, preparedness, and responsible management to ensure the safety of the people. Moreover, shouldn't there be a check on the activities of mushrooming godmen who exploit people's faith and endanger their lives? Many such godmen become so powerful that they are able to dictate terms to the administration and have considerable political clout which gives them power. However, the lack of awareness among people and their sense of helplessness contribute to the proliferation of these godmen who thrive on the ignorance and innocence

Pandemonium in Parliament

As the Modi Govt navigates a new power dynamic, the increased presence and assertiveness of the Opposition suggest a challenging path ahead

he 18th Lok Sabha has the potential for positive functioning. The Modi government said they wantended consensus. Prime Minister Narendra Modi sought agreement and criticised the Opposition for causing problems. Modi stated that in his flowernment would aim to build consensus. The Leader of the Opposition, Rahul Gandhi, also emphasised the importance of the Opposition's role in representing the voice of the people in the House. But at the start of the session, they couldn't agree on important issues. Congress leader Sonia Gandhi wrote in an editorial recently in an English daily that Prime Minister Narendra Mod was "Preaching consensus, provoking confrontation."

consensus, provoking confrontation."
Sonia Gandhi criticised Prime
Minister Modi for not acknowledging the electoral outcome and
for promoting confrontation
over consensus. She expressed
disappointment with the first few
days of the 18th Lok Sabha,
pointing out that there's no sign
of a changed attitude from the
Prime Minister. The 18th Lok
Sabha is a significant shift in
Indian politics, marking the first
time in a decade that Modi is
leading a Parliament from a less
dominant position. This shift in
power dynamics requires him to
navigate a coalition and contend
with a more assertive opposition. power dynamics requires him to navigate a coalition and contend with a more assertive opposition. The Modi government now relies on crucial support from two key allies: DICU) and TDP. This means the NDA allies could significantly influence the Government's plans and actions, a departure from the substantial majority the BJP enjoyed in 2019 and 2014. The increased presence of the Opposition in various parliamentary panels is likely to generate greater engagement. The first session of the current Lok Sabha began with a strong Opposition asserting its rights. Before the session started, there was a dispute over the appointment of BJD M.P. Bhartruhari Mahtab as the proteur Speaker to administer. tem Speaker to administer.* The Congress and the INDIA

bloc members felt that Congress MP Kodukkunil Suresh, elected eight times, should have been given the position. However, the BJP argued that they followed the rules. Mahtab was elected to the House seven times in succession, while Suresh lost two elections. This appointment is significant as the Speaker plays a crucial role in the Indian parliamentary system as the head of the Lok Sabha, responsible for maintaining order, conducting debates, and ensuring the House's smooth functioning. Secondly, Rahul Gandhi said he would back Om Birla, the SOME OPPOSITION PARTIES THOUGHT THE PRESIDENT'S INAUGURAL SPEECH TO A JOINT SESSION he would back Om Birla, the NDA candidate, but only if he would back Om Birla, the NDA candidate, but only if the Deputy Speaker position, usually given to the Opposition, was assured. While Thambi Durai of the AIADMK, a BJP ally at the time, served as the Deputy Speaker from 2014 to 2019, the position remained vacant from 2019 to 2024. Article 93 states two Lok Sabha members will be selected as the Speaker and Deputy Speaker. Om Birla has been re-elected as the Speaker of the 17th Lok Sabha, bringing continuity and stability to the House. After being congratulated, the newly elected Speaker took out a paper and read a resolution against the 1975 Emergency imposed by COUNTRY'S MOST SERIOUS PROBLEMS. OPPOSITION CALLED FOR REMOVING THE SENGOL, WHICH THE PRIME MINISTER

FANFARE BEFORE THE ELECTION

late Prime Minister Indira Gandhi. This surprising move caught many off guard and caused tension with Congress, as the Emergency was declared on the same date in 1975. This led the Leader of the Opposition, Rahul Gandhi, to lead a group to the Speaker to express their objection to a political statement from the chair. Fourthly, some opposition parties thought the president's inaugural speech to a joint session of Parliament ignored the country's most serious problems. Also, the Opposition called for removing the Sengol, which the Prime Minister had installed with much fanfare before the OF PARLIAMENT IGNORED THE with much fanfare before the Election. Fifthly, Rahul and Election. Fifthly, Rahul and other Opposition MPs proposed discussing the leakage of the NEET question paper first. The Speaker, however, insisted that a discussion on the Motion of Thanks to the President's address, a significant issue, should be held first. The first week's confrontation shows despite the decrease in numbers, the BP is unlikely to change its working methods. ALSO, THE HAD INSTALLED WITH MUCH

ods. An energised opposition will also be belligerent. The pro-ceedings in Rajya Sabha also saw disruptions and adjournments as Opposition mem bers raised slogans demand

ing a discussion on the NEET question paper leak issue. There was also a heated argument between the Chairman and Congress President Mallikarjun Kharge. The functioning of the House lies with the Speaker, a position of utmost importance in maintaining order and ensuring fair debates. The Rajya S bha Chairman presides over the Upper House. A functioning House is necessary and a prerequisite for a healthy democracy. The need for constructive cooperation between the Government and the Opposition cannot be overing a discussion on the NEET

Modernising Govt IT: Imperative shift to a multicloud future

From cybersecurity threats to unprecedented data management complexity to systems outages, outdated Tr hinders the government's ability to provide important services in the safest and most efficient manner possible.

most efficient manner possible.
Our technology infrastructure should receive the same attention and investment as our roads bridges, energy, and broadband infrastructure. Instead, current policies deter government IT leaders' ability to choose the best solutions to meet modern challenges. Public agencies are too often using outdated technology and face too many barriers to effectively modernize their systems. With modern technology and data vailability, the government will be able to better track life-threatening illnesses, while policymakers would be armed with relevant data to chart robust policies for prevention and treatment.

According to a Deloitte research report, BFSI sector is also investing more on cloud to transform systems.

Federal and state agencies have been slowly upgrading IT infrastructure over the past decade by shifting to a public cloud computing model. This is primarily driven by the promise of increased efficiency, lower costs, and improved continuity to enhance the services they offer to the public. While many government organizations have taken advantage of the flexibility public cloud computing offers, given privacy, compliance and security concerns, this approach does not work in every situation. It is critical that IT leaders have flexibility to choose the most cost-effective solutions.

tive solutions.
Government agencies should consider a multicloud by design approach,

where you use cloud services from multiple public and private cloud providers. While a single-cloud strategy might seem simpler, it limits service offerings and often commits organizations to a single vendor, which often costs more in the end. A multicloud approach to cloud computing is used for better data control, allows access to the best services from each provider, and offers more flexibility as IT leaders can optimize work-

from each provider, and offers more flexibility as IT leaders can optimize workload placement based on workload requirements. While government agencies and ultimately taxpayers—that adopt multicloud approaches can also have greater control over cost, which is critical at a time when research firm IDC estimates that nearly two-thirds of organizations are spending more on cloud than initially budgeted. Policymakers need to make this multicloud modernization process a reality by investing in the technology modernisation fund allowing government agencies to replace legacy equipment with upgraded multi-

cloud computing solutions that will ensure agencies can provide critical services quickly and securely. This will require that all agencies conduct multi-cloud computing readiness assessments through an evaluation of current IT infrastructure, processes, and policies to determine the best path for adoption. The assessment should look at things like are the agency's applications considered cloud-enabled, what is the cost of migration, do cloud computing solutions meet security and compliance requirements, as well as what is the impact on civil service employees. We cannot fight off cyberattacks and provide the best services possible in the digital age with inadequate and outdated IT infrastructure. Adopting a multicloud approach will help securely manage critical data, cut costs, and allow for our government to use the solutions that are most effective to meet our citizen's needs. CYBERCRIME ON THE RISE

Madam — Despite warnings, people are losing huge amounts of money to cyber criminals via stock market investments and online purchases. Fraudsters generally target the middle-aged and the elderly but youngsters are not spared. People are lured by attractive advertisements on social media platforms like WhatsApp, telegram, Instagram and facebook. When innocent citizens are asked to pump money through websites, they fall in line because the "profit accrued by similar investors" is prominently displayed in the common group. Furthermore, the

because the "profit accrued by similar investors" is prominently displayed in the common group. Furthermore, the fraudsters "train" the investors in stock market intricacies.

Unsuspecting investors are unaware that another victim's money is transferred to his/her " account" to show profit. Duped investors sense something is amiss when they are asked to cought up a substantial commission and when their genuine queries go unanswered or are vaguely shrugged off. However, only when the scamster swindles the hard-earned money out of a person does the latter go to the cyber police. Since most states, if not all, have cyber crime helplines, it is vital to report the fraud very quickly because the cheaters are known to waste little time in hoodwinking the law. It is allways a good practice to ask SEBI or RBI licence from the opposite party. Fake websites can always be checked. Sharing one-time password(OTP) is never a good idea.

said. Senior Superintendent of Police, Etah, ground realities but also exposed his blatant pandering for political gain. Gandhi's speech was aimed more at scoring political points than offering any genuine insight or understanding.

His condescending tone towards Hinduism recked of arrogance and ignorance, further alienating him from the sentiments of millions of Hindus who hold their faith in high regard. Instead of engaging in meaningful discourse on issues that truly matter to the people.

Gandhi delivered a sermon that was hollow, shallow, and devoid of substance. His misguided attempt to redefine Hinduism through a narrow political lens was a slap in the face to the diversity and richness of our cultural heritage. As citizens, we deserve leaders who respect and uphol our values, not those who manipulate them for their selfish ends. It's time for Gandhi and his lik to introspect and understand that India deserves leaders who inspire unity, not division.

CONCERNS ON NEW CRIMINAL LAWS

CONCERNS ON NEW CRIMINAL LAWS
Madam — The editorial on the three new criminal laws(2-7-24) is welcome. In the name of extending justice, the government has hurried through at every stage keeping all democratic norms aside. The Bills were introduced after suspending around 140 opposition members in the parliament and were passed with the least discussion. Such an important Bill should have been placed before the public for widespread discussions and debates and the opposition members who are also elected by the people should have been involved in the process, besides consulting the luminaries in the field.
Nothing is done. How such a law is going to ensure justice? Moreover, it may take quite a long time for all those in the legal field to get themselves familiarised with the new versions. It looks to be a case of smashing a mountain to catch a small rat.

Tragedy in Hathras

Tragedy in Hathras

The tragic stampede in Hathras, Uttar Pradesh, which claimed lives of more than 120 people, predominantly women, is a sombre reminder of the critical importance of crowd management and public safety at large gatherings. This incident, occurring at a religious event hosted by self-styled preacher Narayan Sarkar Hari, known as Bhole Baba, underscores several systemic issues that need urgent attention to prevent such disasters in the future. First, there was blatant disregard for safety regulations and permissible limits on the number of attendees at public events. Reports indicate that the gathering far exceeded the venue's capacity, creating a highly dangerous situation. This over-capacity, coupled with a lack of adequate crowd control measures, set the stage for chaos. The administration's failure to enforce these limits and ensure proper arrangements is a glaring lapse in duty. Effective crowd management requires meticulous planning, including designated entry and exit points, clear signage, and trained personnel to manage the flow of people and respond to emergencies. Moreover, the tragic outcome highlights the need for stringent protocols and accountability. In this case, the local administration and event organisers must be held accountable for their negligence. It is imperative that investigations not only determine the immediate causes of the stampede but also identify the lapses in planning and execution. The findings should lead to actionable recommendations and the establishment of stringent guidelines for future events. Such measures are vital to ensure that the safety of attendees is never compromised for the sake of convenience or expedience.

Additionally, the role of religious and spiritual lead-

ectionice. Additionally, the role of religious and spiritual lead-Additionally, the role of religious and spiritual leaders in organising mass gatherings must be scrutinised. While such events play a significant role in the social and spiritual lives of many, the responsibility for ensuring the safety and well-being of participants cannot be overstated. Religious leaders must work closely with local authorities to adhere to safety regulations and ensure that adequate infrastructure is in place to handle large crowds. This collaboration is crucial in mitigating risks and preventing tragedies. The government's response to the incident, including the announcement of compensation for the victims' families and a promise of a thorough investigation, is a step in the right direction. However, financial compensation alone cannot address the underlying issues. The investigation must be swift, transparent, and result in concrete policy changes. The formation of an investigative committee, as announced, should not be a mere formality but a rigorous process aimed at uncovering the truth and committee, as announced, should not be a mere formality but a rigorous process aimed at uncovering the truth and preventing recurrence. Public awareness and education along a crucial role. Attendees at such events should be informed about safety measures and protocols to follow in case of emergencies. Building a culture of safety and preparedness among the public can significantly reduce the impact of such incidents. Best practices in crowd management must be followed - the Tirumala temple is worthy of emulation - to ensure that the enthusiasm evoked by religiosity does not lead to hysteria. The Hathras stampede is an event that highlights critical failures in crowd management and public safety. Such tragedies must not recur.

Unity's Challenge

The formation of South Africa's new unity government under President Cyril Ramaphosa has ushered in a wave of cautious optimism. With the inclusion of Mr John Steenhuisen from the Democratic Alliance (DA) and of other opposition parties, the government aims to rejuvenate economic and social landscape. This unprecedented coalition, formed out of necessity after the African National Congress (ANC) failed to secure a majority in the May 29 election, has been met with mixed reactions, high-lighting both potential and pitfalls. The decision to bring the DA known for its centre-right non-business stance, into the ingining both potential aith pinals. The decision to Dring the DA, known for its centre-right, pro-business stance, into the fold could be a game-changer for South Africa's economy. The inclusion of key ministries such as agriculture, public works, environment, and basic education under the DA's works, environment, and basic education under the DA's leadership is seen by many as a step toward much-needed economic reform. Business leaders have expressed their readiness to collaborate with the new administration, hoping for policies that foster growth and stability. However, this optimism is tempered by significant concerns. The expand-ed cabinet, now larger to accommodate coalition members, has raised eyebrows. Critics argue that increasing the numnas raised eyerorises. Littles argue that increasing the num-ber of deputy ministers to 43 is an unnecessary burden on the state's resources and contradicts previous calls by the DA itself for a leaner government. This expansion could dilute the efficiency of governance, making it harder to achieve the intended reforms. Moreover, the merit of these appointments has been questioned. The Federation of Unions of South Africa (FEDUSA) and other observers say that political considerations earn to have averabed over Unions of South Africa (FEDUSA) and other observers say that political considerations seem to have overshadowed the need for technical expertise. In an economy struggling to recover from a decade-long slump, appointing leaders based on political allegiance rather than their ability to address the nation's urgent needs is a risky gamble. The absence of outside experts in key portfolios could hinder the coalition's ability to implement effective policies and drive meaningful change. The new government's success will larget depend change. The new government's success will largely depend change. The new government's success will largely depend on its ability to balance political interests with the nation's economic imperatives. While the inclusion of the DA has been welcomed by the business community, the coalition must not squander this goodwill. Swift and decisive action is needed to tackle issues such as unemployment, poverty, and inequality. Ensuring that mentocracy guides appointments and policy decisions will be crucial in maintaining credibility and public rust. In this delicate balancing act, President Ramaphosa and his cabinet face a formidable challenge. They must navigate the complex dynamics of caulition policy. Ramaphosa and his cabinet face a formidable challenge. They must navigate the complex dynamics of coalition politics while delivering on their promises of revival and progress. Failure to do so could deepen public disillusionment and exacerbate existing socio-economic divides. As South Africa stands at this crossroads, the new unity government has an opportunity to chart a course toward a brighter future. By prioritising expertise and efficiency, and fostering genuine collaboration across political lines, it can harness the potential of the coalition to drive the country forward. The coming months will be critical in determining whether this government can rise to the occasion and deliver the change that South Africans desperately need.

Azm-e-Istehkam

Post the pull-out from Afghanistan the strategic stakes that allowed Pakistanis to have a 'blank cheque' or remain 'unanswerable' for their misconduct, have diminished considerably. For once, the Pakistanis need the United States more desperately than the other way round given the dire economic mess they are in. The United States is now in a position to extract some semblance of accountability, commitments, and corrections from Pakistan

nhere is a proven dodginess when it comes to setting mit even with the control of the control of

stakes that allowed Pakistanis to have a 'blank cheque' or remain 'unanswerable' for their mis-conduct, have diminished con-siderably. For once, the Pakista-nis need the United States more desperately than the other way

round given the dire economic mess they are in. The United States is now in a position to extract some semblance of accountability, commitments, and corrections from Pakistan.

Today, serendipitously, the interests of the United States, China, Arab countries and international multilateral agencies national multilateral agencies (and even India) converge, in hoping that Pakistan is able to renege from its duplicitous past dalliances with religious extrem-

ism and terror with its latest com-

with its latest com-mitment i.e. Oper-ation Azm-i-Iste-hkam.

It is not a new militaristic opera-tion given the mu-ltitude that Pakundertaken (with out substantial success), as it has always played a double game with

always played a double game with terror.

In the 1980s, during the Afghan mujahedin days, it diverted a lot of US-Saudi 'ald' for non-Afghan purposes (including towards India). In the 90s it harbored proxies in the Kashmi't Valley e.g., the day of the Wardin Afghan swathes, e.g. the wardin affect of undid the Heanayar and of course, the Tailban.

In the subsequent US-led 'War on Terror', it patronized the Haqqani faction to the discomfuture of Washington. Missing religion and patronising the terror industry has always been too tempting for Pakistan to resist, whatever be the publicly stated position.

But perhaps for the first time, it has a real sense - and filled body-bags - to know for religion card, and that terrorism and extremism are its natural by-products. Islamabad can no longer laser-guide terror towards Afghanistan, India, or Iran.

Extremism and terror even-

Extremism and terror eventually backfire, as playing out with the Pakistani military's unprecedented number of fatalities. So, to that limited extent, perhaps the fight against terror by the Pakistani state was never so persuasively and startlingly hant It ruly seeks international help to cleanse itself of religious extremism and terror, the murky past history notwithstanding. Traditionally, Pakistan had sour; Traditionally, Pakistan had sourced advanced weaponry like the first part of the United States, of the United States, of the United States, of the United States, fighting 'terrorism', even though it was the worst was for India-central training and the production of the United States, which was for India-central training 'terrorism', even though it was for India-central training the production of the United States, which was for India-central training 'terrorism', even though it was the worst was for India-central training the production of the India Control of the India Contr

of consistent misuse and unde-

pendability.
However, what is sought this time towards Operation Azm-i-Istehkam is sophisticated small arms and communications which can only

as a symbol and a symbol and a symbol and a symbol and the symbol and a symbol and

wherein an element of pushback to the Chinese footprint is
inherent.

If such a pegged deal does
come about, not only does it
antamount to tackling religious,
the control of the control of the control
to tackling religious,
but if the same does entail lessened Chinese presence, that lostoned Chinese presence, that contowould be welcomed by Delhi.

The half-sincere past of the
United States in the region
notwithstanding, there is almost
a consensus on tackling religious extremism (especially in
the global terror nurseries with
in Pakistany that binds Washington DC, Beijing, and Delhi.

Only from this circumstantial perspective and lay of the
land, Delhi ought not to get
overly worked up on the thaw
and limited 'aid' (in terms of
small arms et al) by the Americanada in a calculated risk and
undia must take in encouraging
both Operation Azme-Isteham, as also the return of the
United States in the internal
affairs of Pakistan.

In any case, the future
stakes and pivots that India
affords the United States will
remain unmatched (vis-ā-visRakistan) and if peace and de-

remain unmatched (vis-à-vis Pakistan) and if peace and de-radicalisation does return to Pakistan, India could only wel-come the same.

A MEMBER OF THE

🗽 ASIAN VOICES

Viet Nam needs to develop domestic medicinal resources to reduce reliance on imports: expert

cently, the healthcare sector has faced difficulties with the bidding process, drug supply, as well as the procurement of medical supplies and equipment. Shortages of medicines have also occurred in the traditional medicine sector, causes mainly related to the bidding and procurement processes. Specifically when hospitals organise bidding for traditional medicinal herbs, the prices are mostly lower than the market prices are mostly lower than the market prices are mostly of well than the market prices of medicinal marterials depend on planting, caring and yield of medicinal plants, so if there is a crop failure, the prices will be higher and vice versa.

The current issue is that the bid

of meucina plants, so if there is a cruedate prices will be higher and vice. The current issue is that the bid prices for medicinal materials approved at public healthcare facilities are much lower than the market prices. When the bid prices are lower, the suppliers do not participate because they cannot sell the medicinal materials at a loss. Meanwhile, the prices of traditional medicines have increased with the general price inflation in the market. In the control of the prices are the prices and materials and the quality of medical examination and treatment have increased, the prices should also be higher. In principle, traditional medicine can use interchangeable medicine can use interchangeable medicine herbs. For example, in the group of blood-tonifying herbs, there will be

Việt Nam News

seven or eight types.

Therefore, when one of these herbs is in short supply, the doctor can prescribe a different herb as a substitute. The doctor can be feesible in this way without affecting the herbal formula used to treat the illness.

Many herbs, however, are irreplaceable so they still have to be imported. Meanwhile, there are certain regulations for foreign traders exporting to Viet Nam; many countries in the world the still have been supported. Meanwhile, there are certain regulations for foreign traders exporting to Viet Nam; many countries in the world the standards that are not compatible with the regulations. The Department of Traditional Medicine has advised the Ministry of Health to submit to the Government a proposal to amend the decree regulating this issue so that it is in line with the common standards also been practive in implementing the directives of the Ministry of Health to advise and has issued many documents such as Circular 38, Circular 39 regulating the durictives of the Ministry of Health to advise and has issued many documents such as Circular 38, Circular 39 regulating the quality of medicinal herbs, or Circular 32 on regulations of the culti-to-wing directives of the Government, so the supply of medicinal herbs and traditional medicines underdines to hospitals has begun to stabilise. The Department of traditional medicines to hospitals has begun to stabilise. The Department of Traditional Medicine and the hospitals have begun to bid for various types of medicines, combined with the reserve of medicines, combined with the reserve of medicines, combined with the reserve of medicines to the optical partners of traditional medicines at healthcare facilities, as well as regulations on the bidding and procurement of traditional medicines and healthcare facilities, as well as regulations on the export and import of medicinal materials, we need to focus on local supply, investing in the cultilations on the export and import of medicinal materials, we need to focus on local supply, investing in the culti-vation of medicinal plants at home and quality of medicinal materials.

kept secret that it was for India-centric posturing was for India-centric posturing in Cheer Peaks and deployment and deployment that was the context was and deployment to wards fighting the Soviets/Russians in the 80s, found their way to the hands of terroists before administration decided to upgrade the F-16 fleet with the implausible insistence of their exclusive use towards fighting along the Durand Line - unsurprisingly, this aircraft was used in the recent aerial skirmish with India, violating the terms of ale/refurbishment by the United States.

However, the recent request for small arms by Paksian has to be seen in the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical and less-than-reliable commitment for the context of its historical context of its historical context of the context of its historical context

to fight terrorism.

Islamabad cannot escape the fate of sniggers from Delhi that it is crying wolf yet again, as they have earned the notoriety

Work together

SIR, Kalyani Shankar's insightful and thought-provoking article "Can we expect discourse without actimony?" negates the possibility of much-needed consensus between the BJP-led NDA government and the Congress-dominated INDIA alliance amidst the changed dynamics in the Lower House post the recent parliamentary electoral results.

The saffron party's diminishment of the congress of the control o SIR. Kalvani Shankar's insightful

hi's positive response, the open-ing session of the 18th Lok Sabha started on a discordant note.

started on a discordant note.

It was glaringly marked by the shadow of their strained relationship over the election of the Speaker, allegations of paper leaks in NEET-UG and UGC-NET examinations, appointment of the Pro-tem Speaker, repeated critical references to the Emer-gency, the recent railway accident in West Bengal, unemployment,

price rise, and food inflation. price rise, and food inflation. Recognising the new political reality, both the government and the Opposition should rise above petty politicking and observe constraints of political morality and ethics to restore the high standards of polity. For that, the ruling elite should shed arrogance, antagonism, arbitrariness and character assassination. gance, antagonism, arbitrariness and character assassination, refrain from stifling dissenting voices and make room for compromises and adjustments to ensure that parliamentary proceedings are conducted peaceful yand constructively. While providing necessary checks and balances on the government, ances on the government, the Opposition should also maintain the decorum (dientix and sanctiv Opposition should also maintain the decorum, dignity and sanctity of the august House and develop a culture of constructive, principled and sensible criticism. A spirit of bonhomie and cooperation between the Opposition and the Treasury beaches can build a consensus over crucial national sissues such as the CCA, the NRC, Manipur violence and the Agnipath scheme, and strengthen our democratic set-up.

Yours, etc., D S Kang, Hoshiarpur, 1 July.

PROTECT THE PEOPLE

PROTECT THE PEODLE

SIR, Going by your newspaper reports today, I am shocked to find that my native state, West Bengal, is bleeding through a thousand cuts but no effort is being made to heal the wounds either by the ruling party or by the opposition. What can be more heartbreaking than the reports. 'Shooting at Nima', 'Clash over ligeal house case in Howrah', 'Polore records BJP woman activits' statement after 5 days in Gooch Blhar' and last but not the least' Chopra incident.'

What are these governments doning to arrest the politics of violence, rape and murler in this state? Why are criminals and anti-socials becoming so active in this state? Are these mafias and hoodlums getting political protection? All the incidents reported in your esterned daily clearly point to protection from politicians. The most dreadful incident is that which occurred in Chopra where a woman alleged to have had an extra martial affair was beaten up ruthlessly with the rmal eaccomplice in broad day-light. Is West Bengal under Taliban or ISIS? What was the police oding? What is the use of keeping police officers at Islampur Police Station with taxpapers' money? Why should these officers not be put behind bars for criminal negligence? If the sufferings of oppressed ordinary citizens are not taken cognizance of by the administration and human rights continue to get violated in his way, the day is not far when ordinary people will unite to fight against these hoodlums. My sincere appeal to the law enforcement authority is to uphold the fundamental rights of citizens.

Yours, etc., Purushottam Chatterjee, Kolkata, 1 July.

LONELY LIVES

SIR. This refers to the write-up, "Being Lonely" by Manish Nandy, published in today's edition of The Statesman. This piece writen by Mr Nandy is a reflection of the larger picture that is present across our nation. I know many elderly couples who are helplessly strict in this painful situation where they have to lead a lonely

life, without their children staying with them. I have spoken to most of them and realise how difficient it is for them to pass each day with such heavy hearts. Yes, many amongst them are financially supported by their children, but the isolation and agony of solitude at their age grows by the day. This wasn't the case decades ago, when two generations used to live together and helped each

other happily. Nowadays, most amongst the newer generation harbour the dream of traveling and settling abroad for better financial prospects and successfully achieve that as well. But then everything changes back home for their parents. Mr Nandy is so very apit in stating that "lonelism between the stating that "lonelism between the stating that "lonelism between the state of the
