

***Delonix regia* (Bojer ex Hook.) Raf.**

Family: Fabaceae

Common name: Flame tree

Local name: Gulmohar

Importance:

- The leaves are used as forage for livestock and the seeds meal can be fed to farm animals.
- The flowers are a good source of feed for bees and the wood and woody pods can be used as firewood.
- The timber can be used for light construction, fence posts or pirogues.
- The wood is used locally for agricultural implements.
